Why Rentals Beat Buying in Colombia's Water Market

Colombia's agricultural sector faces unpredictable droughts - 40% of farms require new wells by 2025 (Ministry of Agriculture). Yet buying a rig costs \$80,000-\$120,000. Renting cuts initial costs by 90% while offering flexibility. Let's break down water well drilling rig rental prices:

Portable rigs: \$1,500-\$2,300/month (Ideal for small farms)

Mid-capacity rigs: \$2,800-\$3,500/month (Most popular for village projects)

Industrial rigs: \$4,000+/month (Mining/extreme depth use)
