

Core Drilling Rig for Sale in Poland: 2024 Price List, Supplier Quotes & Buying Guide

Core Drilling Rig for Sale in Poland: 2024 Price List, Supplier Quotes & Buying Guide

Wondering how much a core drilling rig costs in Poland? You're not alone. Contractors, construction firms, and mining operators across Central Europe face the same question. With Poland's infrastructure boom - driven by EU funding and road expansion projects - demand for reliable drilling equipment has surged by 12% since 2022. Let's cut through the noise and break down price lists, hidden fees, and trusted suppliers.

What Determines Core Drilling Rig Prices in Poland?

Three factors control your final cost:

Rig type: Handheld models start at EUR15,000, while truck-mounted rigs exceed EUR75,000.

Power source: Electric rigs cost 8-10% less than diesel variants but require stable power access.

Depth capacity: A 50-meter depth rig averages EUR28,000 vs. EUR52,000 for 150-meter systems.

Case Study: Wroclaw Tunnel Project Savings

BauPol Construction saved EUR18,000 on their latest contract by leasing a German-built core drilling rig through a Krakow supplier. The rig's ROI came in 6 months through accelerated concrete sampling work.

Current Market Prices & Hidden Costs

Local Polish suppliers now offer price per piece deals on popular models:

Atlas Copco CS14 (basic model): EUR16,500-EUR24,000

Husqvarna DM 230 (mid-range): EUR28,700-EUR33,400

Sandvik DE130 (industrial): EUR61,000-EUR79,000

Watch for hidden charges like 23% VAT (mandatory in Poland), EUR1,200-EUR2,500 transport fees from EU suppliers, and certification costs for used equipment.

How to Get Competitive Quotes

Top Warsaw-based suppliers like DrillingTechPoland and EuroDrill offer same-day quotations, but you'll need to:

Specify drilling diameter (100mm? 300mm?)

Choose between new/refurbished rigs

Confirm service coverage (60% of Polish suppliers exclude remote repairs)

Why Chinese Rigs Are Flooding the Market

Core Drilling Rig for Sale in Poland: 2024 Price List, Supplier Quotes & Buying Guide

Chinese brands like Siton (EUR14,900-EUR19,800) now hold 22% of Poland's drilling rig market. While cheaper upfront, maintenance part lead times average 6-8 weeks versus 48 hours for EU-made equipment.

Buying vs. Renting: What the Data Shows

Poland's equipment rental market grew 18% in Q1 2024. For short-term projects under 8 months, renting a core drilling rig costs EUR300-EUR600/week. Long-term users still prefer purchases - a EUR45,000 rig typically pays for itself in 2 years through steady contracts.

Ready to compare real-time supplier deals? Contact verified vendors like Boremaster Polska or check the government's "Construction Machinery Export Initiative" portal for tax-rebate eligible models. With Poland's construction sector projected to grow 7.3% in 2024, your next drilling rig investment could be the key to securing lucrative tenders.
