

DTH Drilling Rig Cost in Uzbekistan 2025: Price List, Supplier Quotes & Buying Guide

DTH Drilling Rig Cost in Uzbekistan 2025: Price List, Supplier Quotes & Buying Guide

Need to know how much a DTH drilling rig costs in Uzbekistan? Whether you're drilling for mining, water wells, or construction, pricing is your #1 hurdle. Let's break down 2025 prices, trusted suppliers, and smart ways to cut costs without cutting corners.

DTH Drilling Rig Prices in Uzbekistan: What to Expect

The cost of a DTH drilling rig in Uzbekistan ranges from \$45,000 to \$250,000+ based on depth capacity (100m to 500m), brand, and customization. For example:

Small portable rigs (100-200m depth): \$45,000-\$80,000

Mid-sized rigs (200-400m depth): \$85,000-\$150,000

Heavy-duty rigs (400m+ depth): \$160,000-\$250,000+

China-made rigs dominate 60% of Uzbekistan's market due to 15-25% lower prices than U.S. or European brands. Local suppliers like Tashkent Heavy Machinery offer 2-3-year warranties, while imports often skip customs delays via "project-based" tax incentives for infrastructure projects.

Why Prices Vary: 3 Key Factors

1. Depth and Power: A rig drilling 300m in limestone costs 40% more than a 150m model for soft soil.
2. Custom Add-Ons: Automated rod handlers or dust control systems add \$8,000-\$20,000.
3. Supplier Location: German-made Bauer rigs cost 2x Chinese equivalents but last 30% longer in harsh conditions. Choose based on project ROI, not just upfront cost.

Where to Get Reliable Supplier Quotes in Uzbekistan

Uzbekistan's mining sector grew 8.7% in 2024, boosting demand for durable rigs. For competitive DTH drilling rig quotations, consider:

Local Dealers: Tashkent Machinery Hub offers XCMG rigs at \$58,000-\$180,000 with 6-month payment plans.

Direct Imports: Alibaba suppliers like SANY or Sinocoredrill provide FOB quotes at \$47,500-\$135,000 BUT add 12% customs fees.

Pro Tip: The Uzbek government waives VAT for rigs used in state-backed geothermal projects. Ask suppliers about tax exemptions!

Case Study: Saving \$32,000 on a 300m Rig

Samarkand Mining Co. bought a 300m-depth DTH drilling rig from China's Henan Jeao Heavy Industry. Total cost: \$122,000 (vs. \$154,000 for a similar Atlas Copco model). The rig drilled 18 boreholes/month with 98%

DTH Drilling Rig Cost in Uzbekistan 2025: Price List, Supplier Quotes & Buying Guide

uptime--payback achieved in 14 months.

Final Tips Before You Buy

Always request a price list with technical specs and compare 3-5 quotes. Look for suppliers offering free operator training or spare part bundles. Need faster delivery? Check stock availability in Kazakhstan--shipping to Tashkent takes 3 days by rail vs. 15 days from Shanghai.

Ready to lock in your 2025 rig? Contact trusted dealers early--Uzbekistan's infrastructure boom is pushing lead times to 8-12 weeks for popular models.
