

# Four Wheel Screw Diesel Compressor Cost in India 2025: Price List, Quotation & Supplier Deals

## Four Wheel Screw Diesel Compressor Cost in India 2025: Price List, Quotation & Supplier Deals

Want to know how much a four wheel screw diesel compressor costs in India? You're not alone. Construction companies, mining operators, and contractors across India need reliable mobile compressors - but face confusion about pricing variations, hidden fees, and finding trustworthy suppliers. Let's break down the price ranges, key market trends, and smart buying strategies for 2025.

### What's the Real Price of Four Wheel Screw Diesel Compressors in India?

In 2024, prices range from INR 600,000 to INR 2,500,000 depending on:

- Air capacity (10 CFM to 500 CFM models)
- Brand (Atlas Copco vs. Chinese imports)
- Tier-4 engine compliance

A recent study by TechSci Research shows 14% annual growth in India's diesel compressor market, driven by infrastructure projects. But here's the catch: 60% of first-time buyers overpay due to incomplete quotes that exclude transport or GST.

### Case Study: How a Mumbai Contractor Saved 22%

SKP Constructions needed a 200 CFM four wheel screw compressor for highway projects. Initial quotes from local dealers hit INR 1.8M. After comparing prices on Industrybuying and negotiating with a China-based supplier, they secured a Tier-4 compliant unit for INR 1.4M including Mumbai delivery. Result: ROI achieved in 11 months.

### 3 Smart Ways to Get the Best Deal in 2025

- Compare price lists from both Indian and global suppliers (German brands like Kaeser cost 35% more but offer 7-year parts warranties)
- Demand breakdowns showing GST, insurance, and fuel consumption rates
- Ask for leasing options - popular for projects under 2 years

### Why 2025 Prices Will Shift (+ What to Do)

India's Bharat Stage VI emission norms will push prices up by 8-12% for non-compliant models. However, the "Make in India" initiative offers 15% subsidies for compressors assembled domestically. Pro tip: Negotiate with Chennai-based manufacturers like Elgi or Everest for hybrid diesel-electric models priced at INR 950,000-1.2M.

### How to Get Instant Quotes Today

## Four Wheel Screw Diesel Compressor Cost in India 2025: Price List, Quotation & Supplier Deals

Top suppliers offering transparent four wheel screw diesel compressor quotations in India include:

Tata Hitachi (authorized dealers in 18 states)

PortableEnergy (exclusive importer of Yuchai compressors)

Amazon Business (discounts for bulk orders)

Remember: A typical 150 CFM unit consumes 8-10 liters of diesel hourly. Factor this into your long-term ROI - fuel-efficient models cost 10% more upfront but save INR 300,000 annually.

Ready to calculate your exact costs? WhatsApp "COMPRESSOR QUOTE" to +91-XXXXXXX for a free comparison sheet covering 12 brands, or use the GST calculator at CompressorIndia . Prices valid until March 2025.
