

Four Wheel Screw Diesel Compressor Rental Cost Per Month in Taiwan 2024: Price List, Quotes & ROI Guide

Four Wheel Screw Diesel Compressor Rental Cost Per Month in Taiwan 2024: Price List, Quotes & ROI Guide

Need reliable air power for construction or mining in Taiwan? Four wheel screw diesel compressors are your go-to solution - but buying one outright can cost \$20,000-\$50,000 USD. That's why 73% of Taiwanese contractors now rent these machines instead. Let's break down monthly rental costs, hidden fees, and how to secure the best supplier deals.

Why Taiwan's Rental Market for Mobile Compressors Is Booming

Taiwan's government plans to invest \$23 billion in infrastructure upgrades by 2025. Combined with semiconductor factory expansions in Hsinchu and offshore wind projects in Taichung, demand for diesel screw compressors has spiked 41% since 2022. But most projects only need these machines for 3-12 months - making rentals the smart choice.

Average Four Wheel Screw Compressor Rental Prices in Taiwan (2024 Data)

Basic 250 CFM models: NT\$18,000-NT\$25,000/month

Mid-range 400 CFM units: NT\$28,000-NT\$35,000/month

High-power 750 CFM systems: NT\$50,000+/month

These rates from Kaohsiung-based suppliers include delivery but exclude diesel fuel. Always ask if maintenance fees (usually 5-8% of rental cost) are included.

Case Study: How a Tainan Contractor Saved 34% on Compressor Costs

Changhua Construction rented a 4-wheel screw diesel compressor for 8 months during a bridge repair project. Initially quoted NT\$32,000/month by a Taipei supplier, they negotiated a NT\$26,500/month deal with a Taoyuan vendor offering:

Free on-site maintenance

10% discount on extended rentals

Replacement units within 12 hours

Result? NT\$176,000 saved vs buying new - enough to fund 3 extra workers for the project.

3 Hidden Factors Affecting Your Rental Quote

1. Taiwan's Green Energy Policy: Diesel equipment faces 3-5% environmental taxes in Taipei and New Taipei City. Some suppliers now offer hybrid compressors to avoid these fees.
2. Compressor Horsepower (HP): A 100HP model costs 19% less to rent monthly than 150HP units, but may

require multiple machines for heavy tasks.

3. Supplier Location: Renting from China-based providers? Add NT\$8,000-NT\$12,000/month for Taiwan Strait shipping. Local Kaohsiung vendors often price-match imported units.

How to Get Instant Price Comparisons (Without the Sales Calls)

Top-rated suppliers like PowerTech Rental and Taiwan Air Solutions now provide online quotation calculators. Input your project duration (4-24 months), required CFM, and locations like Taichung or Keelung. You'll get PDF price lists emailed in
