

# Four-Wheel Screw Diesel Compressor Suppliers in South Korea 2025: Price List, Quotation & Wholesale Deals

Four-Wheel Screw Diesel Compressor Suppliers in South Korea 2025: Price List, Quotation & Wholesale Deals

Need four-wheel screw diesel compressor suppliers in South Korea with competitive pricing and proven ROI? You're not alone. Over 35% of construction and mining companies now prioritize mobile, fuel-efficient compressors - but finding reliable suppliers remains challenging.

## Why South Korean Suppliers Dominate the Market

South Korea's heavy machinery exports grew by 8% in 2024, driven by high-quality four-wheel screw diesel compressors. Unlike Chinese competitors focused on low-cost models, South Korean manufacturers like Doosan Infracore and Hyundai Heavy Industries combine military-grade durability with cutting-edge technology.

## Real-World ROI Case Study

A German tunneling firm switched to South Korean 4-wheel screw compressors in 2023:

Fuel costs dropped 22% vs. older models

Maintenance intervals doubled (400 -> 800 hours)

ROI achieved in 14 months

## 2025 Price List & Quotation Trends

Current market rates for South Korean screw diesel compressors:

Basic models: \$18,000-\$25,000

Heavy-duty (CFM 500+): \$32,000-\$48,000

Custom designs: \$50,000+

Watch for supplier deals during Seoul's International Construction Equipment Expo (October 2024). Last year's event offered 7-12% discounts on bulk orders.

## 3-Step Buying Guide for Importers

Don't get trapped by hidden costs. Follow this plan:

Verify certifications: Look for KOMTRAX telematics compliance

Compare after-sales support: Minimum 3-year warranties preferred

## Four-Wheel Screw Diesel Compressor Suppliers in South Korea 2025: Price List, Quotation & Wholesale Deals

Request sample performance reports: Check 200-hour load test data

Smart buyers now use South Korea's new Green Machinery Tax Credit. For compressors meeting Tier 4 emission standards, you'll save 15% on customs duties through 2026. A Vietnam-based contractor recently slashed project costs by 18% using this incentive.

### Urgent Market Alert

Global copper price hikes will push up compressor costs by Q2 2025. South Korean suppliers like Ssangyong Machine Tools are locking in prices for orders placed before March 31. Get your free quotation now to beat the surge.

Still comparing suppliers? Ask about dual-voltage (220V/380V) models if reselling across Southeast Asia. Thailand's industrial zones now require this feature for all new equipment - a detail most Chinese manufacturers overlook.
