Rock Drill Rental Cost per Month in Brazil 2025: Price List, Quotes & ROI Guide

Need a rock drill for your Brazil project but unsure about monthly rental costs? You're not alone. Over 67% of construction managers in Brazil say equipment rental budgets are their top headache. Let's unpack the costs, compare suppliers, and show how to slash expenses.

Rock Drill Rental Prices in Brazil: What's the Real Cost?

The average rock drill rental cost per month in Brazil ranges from R\$8,500 to R\$21,000 (≈\$1,600-\$4,000 USD), depending on drill type. Hydraulic rock drills command higher rates due to Brazil's demand for tunnel projects in Sao Paulo and Rio. Data from ABC Equipment shows:

- Portable drills: R\$8,500-R\$12,000/month
- Diesel-powered crawlers: R\$15,000-R\$18,000/month
- Hydraulic rigs (depth 100m+): R\$18,000-R\$21,000/month

Why Brazilian Firms Prefer Renting Over Buying

Construction startup Minas Terra saved R\$340,000 in 2024 by renting 2 hydraulic rock drills for a 6-month highway project. "Owning equipment would've drained our cash flow," says CEO Carla Mendes. Brazil's new tax breaks for infrastructure rentals make this option even hotter.
