

Screw Diesel Air Compressor Rental Cost in Philippines 2025: Monthly Rates, Quotes & ROI Guide

Screw Diesel Air Compressor Rental Cost in Philippines 2025: Monthly Rates, Quotes & ROI Guide

Need a screw diesel air compressor for construction or mining in the Philippines? Renting one could save you 35-60% upfront costs compared to buying. But how much does it cost per month, and where do you get the best deals? Let's break it down.

Why Contractors Choose Rental Over Buying

Purchasing a new diesel-powered screw compressor in Manila costs PHP1.2M-PHP3.5M. Even used units start at PHP600,000. For short-term projects like road construction or quarry operations, rentals make financial sense. A 2024 survey showed 78% of Filipino contractors now rent heavy equipment for projects under 12 months.

Monthly Rental Costs (2025 Rates)

Small units (10-20 CFM): PHP28,000-PHP45,000/month

Mid-sized (30-50 CFM): PHP51,000-PHP88,000/month

Industrial (60-100 CFM): PHP120,000-PHP195,000/month

Prices vary based on horsepower (15HP vs. 100HP units) and included services. Some suppliers like Maxxima Rentals PH offer free delivery within Luzon. Watch for hidden fuel costs - newer models from China/Germany consume 20% less diesel than 5-year-old units.

Case Study: Saving PHP2.1M on a Batangas Port Project

Dizon Construction rented two screw diesel compressors (40 CFM each) for 8 months instead of buying. Total cost: PHP704,000. Buying equivalent units would've cost PHP2.8M + 15% annual maintenance. Result? 75% cost reduction and zero storage headaches.
