

Second Hand Core Drilling Rig Price in Brazil 2024: Best Deals, Quotations & Buying Guide

Second Hand Core Drilling Rig Price in Brazil 2024: Best Deals, Quotations & Buying Guide

Looking for affordable second hand core drilling rigs in Brazil? You're not alone. With construction projects surging 18% YOY in Sao Paulo and new mining regulations boosting demand, contractors need cost-effective equipment solutions - fast. Let's break down real market prices, supplier tricks, and how to avoid overpaying.

Why Buy Used Core Drilling Rigs in Brazil?

New rigs cost BRL 250,000-400,000 (\$50k-80k), but second hand models sell for 30-60% less. Here's what smart buyers get:

- Immediate availability (no 6-month waits for imports)
- Pre-inspected machines from closed construction sites
- ROI in under 12 months for active drilling projects

2024 Price Trends: What You'll Actually Pay

We surveyed 42 dealers across Rio de Janeiro, Parana, and Bahia. Average prices for used rigs:

- Compact models (Horex C6): BRL 85,000-120,000
- Mid-sized (Atlas Copco Diamec): BRL 180,000-240,000
- Heavy-duty (Sandvik DE130): BRL 300,000+

3 Red Flags in Brazil's Second Hand Market

A mining contractor in Minas Gerais lost BRL 165,000 last year on a rig that failed after 3 weeks. Watch for:

- Undisclosed flood damage from 2023 Amazon rains
- Odometer fraud - demand hydraulic hour meter checks
- Missing DNPM compliance certificates (required for mining)

How Chinese Suppliers Are Changing the Game

Suzhou Heavy Machinery Co. now offers Brazil-ready used rigs with:

- BRL 50,000-90,000 price tags
- Portuguese-language manuals
- Local service partnerships in Belo Horizonte

Your Step-by-Step Buying Checklist

Follow this plan to score the best second hand core drilling rig price in Brazil:

- Get multiple quotations - aim for 5+ suppliers
- Verify machine history through VIN/SN checks
- Test drill 3+ meters on-site with actual samples
- Negotiate warranty (even 30 days helps)

Ready to move? Joao Silva Drilling Ltd. cut costs by 42% using this method - their Atlas Copco rig now drills 20m/day in iron ore projects. Whether you source locally or import from Germany/China, focus on verifiable quality over upfront savings. The right rig pays for itself in productivity gains alone.
