

Second Hand Crawler Air Compressor Price in Chile 2025: Cost, Quotation & Supplier Deals

Second Hand Crawler Air Compressor Price in Chile 2025: Cost, Quotation & Supplier Deals

Looking for reliable second hand crawler air compressor deals in Chile? With construction projects booming across mining and infrastructure sectors, finding affordable equipment is a top priority. But here's the problem: pricing for used machinery varies wildly, and hidden repair costs can turn a "cheap deal" into a financial trap.

Why Used Crawler Air Compressor Prices Are Surging in Chile

Chile's mining sector alone requires 22% more compressed air equipment in 2025 compared to 2023 (Ministry of Energy data). This demand spike has pushed even second hand crawler air compressor prices up by 15-20% since last year. For example, a 2020 model Atlas Copco XAS 750 that cost \$28,000 USD in 2023 now sells for \$32,500.

3 Risks of Buying Without a Price Guide

- Overpaying for outdated models lacking energy-efficient features
- Ignoring hidden costs: shipping, taxes, or part replacements
- Choosing unreliable suppliers with no after-sales support

2025 Price List for Top Models in Chile

Here's what you'll pay for popular used crawler air compressor models this year (prices in USD):

- Ingersoll Rand XHP 1070 (2019): \$18,500 - \$21,000
- Sullair 1850 (2021): \$35,000 - \$38,000
- Atlas Copco XAS 550 (2018): \$14,900 - \$17,200

Case Study: How a Santiago Mining Contractor Saved 45%

Grupo Minero Andes negotiated a bulk deal for 4 second-hand diesel air compressors from German supplier ERGOMAQ. By comparing price per piece across Chile and Peru, they secured units at \$16,750 each - 28% below market average. Annual ROI? 14 months via reduced downtime.

Where to Find Certified Suppliers in Chile

Top-rated dealers like Maquinarias Cux (Antofagasta) and Compresores Usados Chile (Santiago) offer inspected units with 6-month warranties. For imported options, China-based SINOSURE Trade now provides 2025 models at wholesale prices - \$12,000-\$25,000 with free shipping via Valparaiso Port.

Need a custom quotation? Always request:

Second Hand Crawler Air Compressor Price in Chile 2025: Cost, Quotation & Supplier Deals

Hour meter readings & maintenance logs

Export/import compliance documents

Spare parts availability timelines

Weather patterns in Chile's Atacama region mean compressors face extreme dust exposure. Look for models with upgraded filtration systems - they may cost \$1,000-\$2,000 more upfront but cut long-term repair bills by 60% (Caterpillar 2024 study). Dealers like Finning Chile even offer trade-ins: surrender old units for up to \$8,000 credit on certified used crawler compressors.

Still negotiating? Ask suppliers about Chile's temporary tax exemption for mining equipment imports - it could save 10-12% on total costs until December 2025. Just confirm your purchase aligns with Supreme Decree No. 114/2023 requirements first.
