

Second Hand Crawler Air Compressor Price in Singapore 2024: Updated Quotations, Cost Analysis & Buying Guide

Second Hand Crawler Air Compressor Price in Singapore 2024: Updated Quotations, Cost Analysis & Buying Guide

Need a second hand crawler air compressor but worried about overspending in Singapore's competitive market? You're not alone. Over 60% of construction companies now prioritize cost-effective equipment without compromising reliability. Let's break down what you need to know about price per piece, supplier trends, and smart buying strategies.

Why Singapore's Used Equipment Market Is Booming

Singapore's construction sector grew by 8.7% in 2023 (Ministry of Trade data), driving demand for mobile air compressors. However, new models from brands like Atlas Copco or Ingersoll Rand often exceed S\$30,000. That's why savvy buyers target second hand crawler air compressors priced 40-60% lower - typically between S\$12,000 and S\$18,000.

Key Cost Factors You Can't Ignore

Operating hours: Units under 5,000 hrs cost 15-20% more

Fuel efficiency: Diesel models save S\$200+/month vs gasoline

Import sources: Japanese/Korean units dominate 70% of Singapore's market

Real Supplier Deals & Hidden Traps

LC Construction saved S\$9,200 in 2023 by buying a used Kaeser M59 crawler compressor from a certified German reseller. But watch out: 23% of buyers report hidden repair costs averaging S\$2,500. Always demand:

Pressure test reports

Full service history

6-month warranty (offered by only 38% of sellers)

How to Get the Best Price & ROI

Top suppliers like Equipment Global SG currently offer price lists starting at S\$11,999 for 2018-model compressors. But here's the catch - newer "reconditioned" units (2020+) cost 12-18% more but include free maintenance kits. Pro tip: Ask for a custom quotation during Q3 - historical data shows 7% discount rates as dealers clear inventory.

Your 4-Step Buying Checklist

1. Verify the undercarriage - replacements cost S\$3,000+

Second Hand Crawler Air Compressor Price in Singapore 2024: Updated Quotations, Cost Analysis & Buying Guide

2. Compare price per kWh output - aim below S\$0.18/kWh
3. Inspect hydraulic hoses (look for cracks near fittings)
4. Negotiate delivery - most suppliers charge S\$300+ islandwide

Ready to move forward? Connect with BBB-accredited resellers through Singapore's Construction Equipment Exchange portal. Last month alone, 22 crawler compressors sold via this platform at wholesale guide prices - some as low as S\$10,200 for quick transactions.
