

Second Hand DTH Drilling Rig for Sale in Poland 2024: Price List, Quotation & Buying Guide

Second Hand DTH Drilling Rig for Sale in Poland 2024: Price List, Quotation & Buying Guide

If you need a second hand DTH drilling rig price in Poland, you're likely balancing budget limits against urgent project demands. The Polish mining and construction sector grew 8.3% in 2023 (Eurostat), creating fierce competition for affordable heavy machinery. Let's cut through the noise to help you find reliable rigs without breaking the bank.

Why Second Hand DTH Rigs Dominate Polish Projects

Over 60% of drilling contractors in Poland now use refurbished equipment, according to Warsaw Machinery Trade Association data. A quality second hand DTH drilling rig can cost 40-60% less than new models while delivering 80-90% of their performance. Take Poznan-based KopalTech LLC: They bought two used Sandvik DX700 rigs in 2023 for EUR185,000 each (30% below new price) and completed their shale gas project 4 weeks ahead of schedule.

Current Market Prices in Key Regions

Average price in Poland for 2018-2022 models:

Mid-size rigs (Depth 100-300m): EUR75,000 - EUR140,000

Heavy-duty rigs (Depth 500m+): EUR180,000 - EUR320,000

Prices fluctuate based on engine hours, hydraulic system upgrades, and included drilling tools. German-sourced rigs typically cost 12-18% more than Chinese equivalents but offer better ROI through longer service life.

3-Step Buying Strategy for Maximum Savings

Verify certifications: Look for EUCE certification stickers and maintenance logs - uncertified rigs may cost 20% less but carry hidden repair risks

Test key components: Demand 4-hour on-site testing of hydraulic pumps (target pressure: 280-350 bar) and rotation motors (minimum 120 rpm)

Negotiate support packages: Top suppliers like DrillingPro Poland offer 6-month warranties + discounted spare parts bundles

Supplier Deals You Can't Afford to Miss

Wroclaw-based RigMarket.pl currently lists 14 verified DTH drilling rigs in Poland, including a 2020 Atlas

Second Hand DTH Drilling Rig for Sale in Poland 2024: Price List, Quotation & Buying Guide

Copco ROC L8 at EUR158,000 (28% below 2023 peak price). Their July 2024 promotion includes free shipping within Poland + 3 months of technical support. Meanwhile, Gdansk Port Suppliers reports a 15% month-on-month increase in Chinese-made SANY rigs - a basic SR150C model now starts at EUR92,000 with 6-month customs clearance support.

Remember: Always compare price per drilling meter rather than just upfront cost. A EUR120,000 rig requiring EUR800/day maintenance could be worse value than a EUR150,000 unit with EUR300/day operational costs. Use supplier quotations to calculate total project expenses before committing. Ready to drill smarter? Start requesting customized price lists from trusted vendors today - most provide same-day responses during business hours.
