

# Second Hand Diesel Generator Price in Israel 2024: Updated Cost, Quotation & Buying Guide

## Second Hand Diesel Generator Price in Israel 2024: Updated Cost, Quotation & Buying Guide

Need reliable backup power without breaking the bank? Second hand diesel generators in Israel offer up to 40% savings compared to new units. But with prices ranging from \$3,500 to \$50,000+ depending on capacity and condition, how do you find fair deals?

### Why Prices Vary Wildly - Israel's Market Trends

Over 12,000 used diesel generators were sold across Israel in 2023. Popular models from Cummins, Perkins, and Chinese suppliers like SDEC dominate this market. Here's what impacts price per kWh:

1,500kVA units: Averaged ILS250,000 (≈\$69,000) for EU-made units

500kVA Chinese imports: Sold for as low as ILS90,000 (≈\$25,000)

Generators over 10 years old saw 15% price drops after 2023 emissions law updates

### Tel Aviv Hospital Case Study

A private hospital bought a refurbished 800kVA Volvo generator for ILS180,000 - 35% cheaper than new. Supplier inspection reports showed only 2,300 operating hours. Their first-year ROI from reduced downtime? Over ILS600,000.

### 3 Steps to Avoid Costly Mistakes

#### Step 1: Demand Load Testing

Always verify runtime under 75-100% load. A "bargain" ILS50,000 300kVA generator failed after 8 hours during testing - requiring ILS12,000 in repairs.

#### Step 2: Check Service Histories

Generators with incomplete maintenance logs sell 22% cheaper... but have 3x higher failure rates. Stick to units from authorized dealers like Tel Power Solutions or Israel Energy Group.

#### Step 3: Compare Regional Wholesale Options

Importing from Germany/UAE can save 8-15%, but factor in:

-> Shipping: ILS8,000-20,000 per container

-> Customs: 18% VAT + 5-12% duty on used machinery

-> Local compliance upgrades (avg. ILS15,000)

Where to Get Free Price Quotes

Top Israeli suppliers currently offering verified used generators with 24-month warranties:

### 1. GenPower Israel

Specializes in ex-factory units from Europe. Recent quote: 200kVA Perkins for ILS95,000 (includes installation)

### 2. EcoEnergy Solutions

Imports low-hour Chinese generators. Sample price list shows 100kVA models from ILS48,000.

Prices updated as of June 2024 show 5-7% increases for EU brands, while Chinese units remain stable. With planned electricity rate hikes, early buyers could lock in better deals before peak summer demand.
