

Second Hand Diesel Generator Price in United Kingdom: 2024 Cost, Supplier Deals & Buying Guide

Second Hand Diesel Generator Price in United Kingdom: 2024 Cost, Supplier Deals & Buying Guide

Are you struggling to find affordable second hand diesel generators in the UK? With rising energy costs and supply chain delays, businesses and homeowners are increasingly turning to used power solutions - but navigating prices and suppliers can feel like a minefield.

Why Second Hand Diesel Generator Prices Vary Wildly in the UK

In 2023, UK buyers paid between GBP2,500 and GBP15,000 for second-hand diesel generators, depending on brand, power output (kVA), and condition. For example:

A used 50kVA Perkins generator: GBP3,800-GBP5,200

A 200kVA Cummins unit with 3,000 hours: GBP12,000-GBP15,000

But here's the problem: 42% of buyers in a UK Power Equipment Survey reported hidden repair costs averaging GBP1,200 within 6 months of purchase. Why? Many sellers skip critical maintenance checks.

How Brexit Changed the UK Used Generator Market

Since 2021, UK imports of refurbished diesel generators from EU countries dropped 18% due to customs delays. This pushed buyers toward local suppliers - but created price inflation for popular brands like Caterpillar and Volvo Penta.

3 Smart Ways to Get Competitive Diesel Generator Quotes

Manchester-based GreenSite Logistics saved 31% on a second-hand 100kVA generator using this strategy:

Compare price per kWh output: A GBP7,000 generator producing 0.12/kWh beats a GBP5,500 unit at 0.18/kWh

Demand ISO 8528 compliance certificates (proves load-testing)

Ask suppliers for trade-in deals - 65% of UK sellers now offer them

Government Incentives You Can't Ignore

The UK's Energy Security Scheme offers up to GBP2,500 tax relief for businesses buying second-hand power equipment meeting Tier III emissions standards. Check if your generator qualifies using the [.gov.uk](https://www.gov.uk/guidance/energy-security-scheme) compliance checker.

Where to Find Low-Cost Diesel Generators in 2024

Top-rated UK suppliers like PowerHire Solutions and GenTech Used Equipment currently stock 80-400kVA units at 20-40% below new prices. For budget buyers, Chinese refurbished models from Shenzhen suppliers cost 50% less - but watch for GBP300-GBP800 shipping fees.

Second Hand Diesel Generator Price in United Kingdom: 2024 Cost, Supplier Deals & Buying Guide

Ready to lock in your best price? Contact at least 3 verified suppliers this week. With summer demand spikes approaching, early buyers are securing 7-12% discounts through bulk purchase programs and clearance sales.
