

Second Hand Diesel Generator for Sale in Bangladesh 2025: Price List, Suppliers & ROI Guide

Second Hand Diesel Generator for Sale in Bangladesh 2025: Price List, Suppliers & ROI Guide

Are you tired of paying sky-high prices for new diesel generators? In Bangladesh, where daily power outages last 4-6 hours (World Bank, 2024), businesses desperately need backup power solutions. But here's the shocker: a brand-new 200kVA diesel generator costs \$25,000-\$40,000. That's why smart buyers are turning to second-hand diesel generators in Bangladesh - where prices start at just 30% of retail. Let's break down the real costs and how to avoid scams.

Why Second-Hand Generators Rule Bangladesh's Market

Over 58% of Dhaka's factories now use refurbished equipment. The reason? Three brutal facts:

New generator prices jumped 22% since 2023 (Bangladesh Tariff Commission)

70% cost savings - a 150kVA used unit sells for \$8,500 vs \$28,000 new

China-to-Bangladesh second-hand imports surged 340% last year

The Hidden Costs Most Sellers Won't Tell You

Last month, a Chittagong garment factory bought a "barely used" generator for \$6,200. The catch? It needed \$3,800 in engine repairs. That's why our verified supplier checklist matters:

Key price factors for used diesel generators:

Brand: Chinese (Lutian) units cost \$3,500-\$7,000 vs German (Volvo) at \$12,000+
