Second Hand Drilling Bits for Sale in Brazil 2024: Price List, Supplier Deals & ROI Guide

Why Buy Second-Hand Drilling Bits in Brazil?

Brazilian construction and mining companies spent R\$1.2 billion on drilling bits in 2023. With rising steel costs and import taxes, second hand drilling bit prices in Brazil now offer 40-60% savings vs new equipment. But many buyers struggle to find trusted suppliers and verify ROI.

The Hidden Problem With Used Equipment

"We bought discounted used drilling bits last year, but 30% failed within 3 months," says Joao Silva from a Belo Horizonte mining firm. Common risks include:

- Undisclosed cracks in tungsten carbide tips
- Mismatched sizing for Brazilian soil conditions
- No warranty from fly-by-night sellers

What's the Real Cost of Second-Hand Drilling Bits in Brazil?

Average price per piece ranges from R\$800 (3-inch tricone) to R\$5,200 (12-inch PDC). Below are verified 2024 quotes from Sao Paulo suppliers:

- Tricone bits: R\$800-R\$2,300 (40% below new)
- PDC bits: R\$3,900-R\$5,200 (55% discount)
- Wholesale lots (10+ pieces): 7-12% extra savings

"What's the price per kWh efficiency vs new models?"

"Do you provide Portuguese-language technical support?"

"Can I get a 30-day trial period?"

With Brazil's oil/gas sector expanding by 8% annually (IBGE 2024 data), smart second-hand drilling bit purchases could cut your project costs faster than offshore drilling reaches pre-salt layers.
