

# Second Hand Drilling Hammer Price in Australia: 2024 Cost List, Wholesale Deals & Buying Guide

## Second Hand Drilling Hammer Price in Australia: 2024 Cost List, Wholesale Deals & Buying Guide

Looking for reliable second hand drilling hammers at competitive prices in Australia? With mining and construction projects booming nationwide, demand for affordable equipment has surged by 27% since 2022. But navigating price fluctuations and quality risks can feel like drilling through solid rock. Let's break down what you need to know.

### Why Second Hand Drilling Hammers Are Gaining Traction

Australia's resource sector spent over AUD \$1.2 billion on used heavy machinery last year. A refurbished drilling hammer typically costs 30-50% less than new models, with prices ranging from AUD \$8,000 to \$35,000 depending on brand and condition. But here's the catch:

24% of buyers report unexpected repair costs within 6 months

Prices vary wildly between states - Western Australia quotes average 18% higher than Queensland

### The Hidden Costs of Cheap Deals

Take the case of a Brisbane contractor who bought a used drilling hammer for AUD \$11,500 in 2023. Within 3 months, they spent an extra AUD \$6,200 replacing worn hydraulic parts. That's why smart buyers focus on ROI, not just upfront cost.

### 2024 Price Guide for Australia's Second Hand Market

Based on recent auctions and dealer listings:

Atlas Copco T35W: AUD \$28,000-\$34,000 (refurbished with 6-month warranty)

Sandvik HLX5: AUD \$18,500-\$24,000 (2,000-3,500 working hours)

Chinese OEM Models: AUD \$8,000-\$12,000 (ideal for short-term projects)

### Where to Find Verified Suppliers

Top-rated Australian suppliers like Machinery Circle and Pickles Auctions offer free inspection reports. For bulk wholesale purchases (5+ units), some Chinese manufacturers offer container shipments to Sydney/Melbourne at 40% lower price per piece than local options.

### 3-Step Buying Strategy for Maximum Savings

1. Get Multiple Quotations: Compare at least 3 sellers - prices can differ by up to AUD \$5,000 for identical models.

2. Check State Incentives: Queensland offers 15% tax rebates for equipment used in renewable energy projects.
3. Time Your Purchase: Auction prices drop 11% on average during April-May (pre-budget season).

A Perth mining company saved AUD \$120,000 last month by purchasing 4 used drilling hammers through a bonded warehouse in Shanghai - proof that global deals beat local price lists when you know where to look.

Always request oil analysis reports and maintenance history before finalizing any second hand drilling hammer purchase. With the right approach, you'll strike the perfect balance between upfront cost and long-term reliability.
