

# Second Hand Drilling Hammer Price in Pakistan 2024: Best Deals, Quotation & Buying Guide

## Second Hand Drilling Hammer Price in Pakistan 2024: Best Deals, Quotation & Buying Guide

Pakistan's construction sector is booming - but rising equipment costs have contractors scrambling for affordable solutions. If you're searching for second hand drilling hammer price in Pakistan, you're not alone. Over 62% of small-scale builders now opt for refurbished tools to cut costs. But here's the problem: Prices vary wildly between suppliers, and hidden defects can turn a "cheap" purchase into a financial disaster.

### Pakistan's Second Hand Drilling Hammer Market: Trends & Price Ranges

A 2023 Karachi Chamber of Commerce report shows a 10% annual growth in demand for used drilling hammers, driven by infrastructure projects like CPEC. Average price per piece ranges from PKR 220,000 to PKR 550,000 (\$800-\$2,000 USD), depending on:

- Brand reputation (Atlas Copco vs. local manufacturers)
- Machine age (3-5 years preferred)
- Import source (China-based suppliers dominate 65% of stock)

### Case Study: Lahore Contractor Saves 30% with Refurbished Drilling Hammer

Muhammad Ali Construction switched to a China-imported second hand drilling hammer in 2023 after their new model broke down. Their PKR 395,000 purchase (vs. PKR 1.2M for a new unit) cut project costs by 18% while maintaining drilling speeds of 1,200 RPM. "We got a 6-month warranty and saved enough to hire two extra workers," Ali told our team.

### How to Buy Second Hand Drilling Hammers in Pakistan (Without Getting Scammed)

Follow this buying guide to avoid the top 3 pitfalls reported by Rawalpindi buyers:

- Check hydraulic pressure - Test for leaks under 250 bar minimum
- Demand price quotations with breakdowns (transport, taxes, refurbishment costs)
- Verify supplier certifications - Look for PAAPAM membership or ISO 9001

### Finding Trusted Suppliers: Local vs. China-Based Options

While Lahore's Badar Colony market offers immediate inspection, Guangzhou exporters like Welson Machinery often provide 15-20% lower wholesale prices. We compared two 2024 price lists:

- o Local supplier (Karachi): PKR 485,000 with 3-month warranty
- o China import (via Gwadar Port): PKR 410,000 + PKR 35,000 shipping

Pro tip: Ask suppliers about Pakistan's 2024 tariff changes - some refurbished equipment now qualifies for 7% duty exemptions under the SRO 237 scheme. A Sialkot buyer recently saved PKR 112,000 using this incentive
