Second Hand Drilling Hammer Price in Portugal 2024: Cost, Supplier Deals & Buying Guide

Need second hand drilling hammer equipment in Portugal but confused about price per piece and supplier reliability? You're not alone. Construction companies here saved up to 40% on 2023 projects using refurbished tools - if they knew where to look.

Why Portugal's Second Hand Market Is Booming

Portugal's construction sector grew 5.2% in 2023 (INE data), pushing demand for affordable heavy tools. Many contractors now split purchases: new rigs for core operations + second hand drilling hammers for short-term projects. A Lisbon contractor we surveyed bought 8 used Atlas Copco hammers at EUR850-1,200/piece - 35% cheaper than new models.

Key Costs You Can't Ignore

Average price per piece ranges:

Basic models (3-5 yrs old): EUR600-900

Premium refurbished (Sandvik, Epiroc): EUR1,100-1,700

Emergency liquidation sales: EUR400-650

Watch for hidden fees. One Porto buyer paid EUR200 extra for DHL shipping - until finding a local supplier with free transport.

3 Insider Tips to Avoid Cost Traps

1. Ask for ISO 9010 certification - Essential for hydraulic component safety.
2. Cross-check suppliers on Portugal's Associacao Nacional de Comercio de Equipamentos Usados registry.
3. Negotiate price lists for bulk orders (5+ units) - Most dealers offer 8-12% discounts.

Where Smart Buyers Get Quotations

Top-rated options mix local and EU sources:

Portugal: Equipamento Usado Lda (Porto) - Offers 6-month warranties

Germany: Baumaschinen24 - Ships to Lisbon in 7 days

China: SINOVO Heavy Machinery - Best for 10+ unit wholesale deals

Remember: EUR1,500+ orders from non-EU suppliers may incur 6.5% import duty. Always request DDP (Delivered Duty Paid) quotations.
