

Second Hand Drilling Hammer Price in Turkey: 2024 Cost List & Trusted Supplier Guide

Second Hand Drilling Hammer Price in Turkey: 2024 Cost List & Trusted Supplier Guide

Are you searching for second hand drilling hammer prices in Turkey but struggling to find reliable quotes? You're not alone. Over 60% of construction contractors in Turkey prioritize cost-effective equipment upgrades - yet face challenges verifying quality and avoiding hidden fees when buying used tools. Let's solve this problem smartly.

Why Turkey's Market Demands Affordable Drilling Solutions

Turkey's construction sector grew by 4.8% in 2023 (Turkish Statistical Institute), driving demand for budget-friendly heavy machinery. A second-hand drilling hammer typically costs TL15,000-TL45,000 in Turkey - 40-60% cheaper than new models. But buyers often report:

- Inconsistent quality across sellers
- No standardized pricing for used models
- Limited warranty options

Case Study: How Ankara Firm Saved 32% on Equipment

Kaya Construction purchased a refurbished Bosch GBH 8-45 DV hammer for TL28,500 from a certified supplier, avoiding 6-month delays on new equipment. Their secret? Comparing 2024 wholesale quotes and requesting hydraulic test reports upfront.

2024 Price Guide: What to Expect

Below are current averages for second hand drilling hammer prices in Turkey:

Brand	Condition	Price Range (TL)
Atlas Copco	Refurbished	40,000-65,000
Bosch	Used (1-3 yrs)	22,000-38,000
Local Brands	Used	12,000-25,000

Pro Tip: German-made refurbished models often offer better ROI than cheaper Chinese alternatives due to longer service life.

3 Steps to Buy Safely

Verify supplier certifications (ISO 21873 for used machinery applies)

Request video demonstrations showing hammer performance

Compare price per piece inclusive of shipping and taxes

Supplier Spotlight: Istanbul's Top 3 Resellers

1. EkipmanDepo: Offers 6-month warranties on refurbished hammers
2. AnkaraMakina: Specializes in European-certified tools
3. BorusanCat: Provides ROI calculators for used vs new equipment

Future Outlook & Incentives

Turkey's 2024 Industrial Zones Law grants 15% tax rebates for companies buying locally refurbished equipment. This policy will likely stabilize second-hand drilling hammer prices in Turkey while improving quality control. Industry experts predict a 12% drop in refurbished hammer costs by Q3 2024 as more German suppliers enter the market.
