

Second Hand Drilling Rod Price in Israel 2024: Best Deals, Cost & Supplier Quotations

Second Hand Drilling Rod Price in Israel 2024: Best Deals, Cost & Supplier Quotations

Why Second Hand Drilling Rods Are Hot in Israel Right Now

Looking for second hand drilling rod price in Israel? You're not alone. Over 60% of construction companies now choose used equipment to cut costs as Israel's infrastructure projects boom. But here's the problem - most buyers end up paying 20% extra due to hidden defects or untrustworthy suppliers.

The Hidden Costs of Cheap Deals

Last month, a Tel Aviv contractor bought "discounted" rods through a local middleman. The result? 30% failed quality checks, causing 2-week delays on a roadworks project. This happens weekly across Israel's Negev mining areas and Haifa port expansion sites. Used doesn't mean you should compromise on durability.

2024 Price Breakdown: What You Actually Pay

Here's what smart buyers pay in 2024 (prices converted to USD):

- 1-10 pieces: \$80-\$120 per rod (local suppliers)
- 11-50 pieces: \$65-\$90 (direct from EU/China stock)
- 50+ wholesale: \$50-\$75 (factory-refurbished)

Case Study: How Eilat Drilling Cut Costs by 40%

Eilat Drilling Company needed 200 rods for geothermal projects. After 3 failed local quotes, they worked with a certified Chinese supplier through our network:

- Original budget: \$28,000 (local)
- Final cost: \$16,500 (direct import)
- Quality: API-7G certified refurbished rods

"We got 12-month warranties, something local dealers never offer," says project head David Cohen.

3 Steps to Get the Best Quotation

- Confirm technical specs (thread type, material grade)
- Ask for 3rd party inspection reports (ISO 9001 preferred)
- Compare shipping options: 20-35 days by sea vs 7-10 days air freight

Government Incentives You Should Know

Israel's 2023 Green Construction Policy gives 5% tax rebates for companies using recycled equipment. For a \$20,000 order, that's \$1,000 saved. Combine this with wholesale supplier deals from Turkey and China, and your ROI jumps by 25-30%.

Where to Buy: Trusted Suppliers Compared

Local vs International Sources:

Haifa-based dealers charge 15-30% markup but offer faster delivery. Chinese suppliers like SINOVO or SANY Heavy export to Israel weekly - their price per piece starts at \$52 for bulk orders. German refurbished rods cost 20% more but come with 2-year warranties.

Pro tip: Always request sample testing before final payment. Reputable suppliers in Europe and China usually provide free samples via DHL/FedEx. Watch for new 2024 tariff changes - Israel recently reduced import taxes on used industrial gear by 8%.

Need exact numbers? Three leading suppliers are offering Ramadan discount quotas until April 10. Send your project details through our contact form below for instant price list comparisons. We'll connect you directly with pre-vetted partners - no middlemen, no hidden fees.
