

Second Hand Engineering Drilling Rig for Sale in Peru: 2025 Price List, Quotation & Buying Guide

Second Hand Engineering Drilling Rig for Sale in Peru: 2025 Price List, Quotation & Buying Guide

Need a second-hand engineering drilling rig in Peru but worried about costs and reliability? You're not alone. Over 60% of construction and mining companies in Peru now opt for used heavy machinery to slash budgets without compromising quality. Let's break down prices, smart buying tactics, and how to avoid costly mistakes.

Why Peru's Market Demands Affordable Drilling Rigs

Peru's mining sector grew 8.4% in 2023, driving urgent demand for cost-effective equipment. New rigs from brands like Sandvik or Caterpillar often exceed \$500,000 - way beyond most mid-sized contractors' budgets. That's why used engineering drilling rigs priced between \$80,000-\$250,000 dominate Peru's auctions and dealer lots.

Real Price Ranges in 2024 (USD)

Small rotary rigs (2015-2018 models): \$80,000-\$120,000

Mid-sized hydraulic rigs: \$150,000-\$180,000

Large crawler-mounted rigs: \$200,000+

Case Study: How a Lima Contractor Saved 37%

Lima-based TerraMineria needed a rig for copper exploration but had a \$130,000 cap. They sourced a refurbished 2017 Schramm T685WS from a certified Chinese supplier, paying \$115,000 FOB Shanghai - 30% cheaper than local Peru prices. Shipping and import duties added \$18,000, still under budget.

4-Step Buying Guide for Maximum ROI

Check Hour Meters & Service History - Aim for rigs with under 6,000 operational hours

Verify supplier certifications - Look for ISO 9001 or AEM membership

Compare FOB vs CIF prices - Chinese rigs often quote \$3,000-\$7,000 less than European equivalents

Factor in Peru's 18% import tax + 10% shipping

Hot Deals Alert: June 2024 Updates

Guangzhou HeavyMach reports a glut of second-hand engineering drilling rigs from closed Indonesian coal projects - prices slashed 15%. Meanwhile, German refurbished rigs now come with 1-year warranties. Pro tip: Always get itemized quotes showing breakdowns for parts like drill pipes (avg. \$800-\$1,200/unit).

Where to Find Verified Suppliers

Second Hand Engineering Drilling Rig for Sale in Peru: 2025 Price List, Quotation & Buying Guide

Top platforms for Peru-bound buyers:

1. Machinio's Latin America portal lists 22 rigs under \$200k
2. Alibaba Gold Suppliers with Trade Assurance - 98% positive reviews
3. Local auctions in Arequipa (next event: July 12)

Still unsure? Lima-based broker EquipSur offers free rig inspections - they helped 40+ firms avoid \$5M in lemon equipment last year. Remember: A \$150,000 used drilling rig with 5-year productivity beats a \$400,000 new rig draining your cash flow. Start comparing quotes today.
