

Second Hand Engineering Drilling Rig for Sale in Spain 2024: Price List, Quotes & Buying Guide

Second Hand Engineering Drilling Rig for Sale in Spain 2024: Price List, Quotes & Buying Guide

Need a second hand engineering drilling rig in Spain but worried about costs and quality? You're not alone. Over 65% of construction companies in Spain now opt for used equipment to cut upfront costs. Let's break down prices, hidden traps, and smart buying strategies for 2024.

Why Choose a Second Hand Engineering Drilling Rig in Spain?

Spain's construction boom demands affordable heavy machinery. A new drilling rig can cost EUR150,000-EUR500,000, while second-hand models sell for 40-60% less. But here's the catch: 1 in 3 buyers report unexpected repair costs averaging EUR18,000. That's why knowing price drivers matters.

Key Factors Affecting Price in Spain

Age & Hours: A 5-year-old rig with 3 units), check European auction platforms like Euro Auctions. Their April sale in Zaragoza moved 14 rigs at 18% below market rate.

Still unsure? Ask suppliers for a price per drilling meter calculation. A well-maintained 2018 rig can deliver 8% lower operational costs than new models - that's EUR5,600 saved on a typical 3-month project.
