

# Second-Hand Engineering Drilling Rig for Sale in USA: 2024 Price List & ROI-Focused Buying Guide

Second-Hand Engineering Drilling Rig for Sale in USA: 2024 Price List & ROI-Focused Buying Guide

Need an engineering drilling rig but worried about crushing upfront costs? You're not alone. Over 60% of US contractors now buy second-hand drilling equipment to save 40-70% versus new rigs. Let's explore how to score the best deals on pre-owned engineering drilling rigs without compromising quality.

What's Driving Demand for Second-Hand Rigs in America?

The US construction boom (projected 5% growth in 2024) meets tight budgets. A brand-new 300HP rotary drilling rig costs \$300,000+, while comparable used engineering drilling rigs sell for \$50,000-\$200,000. States like Texas and Florida see 22% annual growth in used heavy equipment sales.

Case Study: Texas Road Contractor Saves \$178K

Borderline Construction upgraded their fleet with two 2019-model Atlas Copco FlexiROC T35 rigs (originally \$240K each) for \$161,000 total. Their ROI? 14 months via new highway contracts. "We checked maintenance logs and got drilling depth guarantees," said CEO Mark Treadwell.

2024 Price Trends for Pre-Owned Drilling Rigs

Basic truck-mounted rigs (2015-2018): \$28,000-\$75,000

Mid-tier crawler rigs (2019-2021): \$80,000-\$150,000

High-capacity rigs (2022-2023 models): \$180,000+

Market Alert: Tariffs on Chinese-made new rigs (up to 25%) make American/European second-hand engineering drilling rigs 30% more cost-effective for foundation projects.

5-Step Buying Guide to Avoid Costly Mistakes

Verify drill depth capacity matches your needs

Request complete service history (minimum 2,000 hours)

Test hydraulic pressure & engine RPM stability

Check availability of spare parts in North America

Negotiate 30-90 day mechanical warranty

Pro Tip: Alabama's RigPro Auctions offers free price quotations with 12-month maintenance packages on certified used equipment.

Where to Find Supplier Deals & Bulk Purchase Options

## Second-Hand Engineering Drilling Rig for Sale in USA: 2024 Price List & ROI-Focused Buying Guide

Top US suppliers like Machinery Partner and Heavy Equipment Trader now offer:

- No-haggle pricing on inspected units
- Wholesale discounts for 3+ rig purchases
- 0% financing for qualified contractors

Last month, a Pennsylvania energy firm saved 19% by buying three 2020 Schramm T685 rigs through a Midwest liquidation event. "We compared 7 price lists before sealing the deal," noted purchasing manager Lisa Fremont.
