

# Second Hand Four-Wheel Screw Diesel Compressor for Sale 2024: Price List, Quotation & Wholesale Deals

Second Hand Four-Wheel Screw Diesel Compressor for Sale 2024: Price List, Quotation & Wholesale Deals

Looking for a second hand four-wheel screw diesel compressor in the UK? You're not alone. Over 68% of construction businesses now opt for refurbished equipment to cut costs. Let's break down current prices, smart buying strategies, and trusted suppliers to help you secure the best ROI.

## Why UK Buyers Choose Second-Hand Screw Compressors

New screw diesel compressors cost GBP15,000-GBP50,000+. But second-hand models in working condition sell for 40-60% less. With rising fuel prices and tighter budgets, recycled equipment has become a lifeline for contractors. A recent survey shows 82% of UK buyers prioritize pre-owned machines with certified service histories.

## The Price Reality: What to Expect in 2024

Current average prices for used four-wheel screw diesel compressors in Britain:

Small units (10-15 CFM): GBP3,800-GBP6,200

Mid-size (16-30 CFM): GBP7,500-GBP12,000

Heavy-duty (30+ CFM): GBP13,000-GBP18,500

These ranges reflect machines with 3-7 years of use. Premium German brands like Atlas Copco or Kaeser cost 15-20% more than Chinese models but offer better resale value.

## Case Study: How Midlands Contractor Saved GBP11K

Birmingham-based Rockwell Construction needed a 25 CFM compressor for roadworks. Instead of buying new (GBP24,000), they sourced a 2019 Atlas Copco XAS 37 KD-7 from a Liverpool dealer for GBP13,200. Certified refurbishment included:

Complete engine overhaul

New air-end bearings

12-month warranty

Total savings: GBP10,800 + 20% VAT reduction through HMRC's Capital Allowance scheme.

## Smart Buying Guide: 3 Rules for UK Purchases

1. Always check maintenance logs - 90% of failed purchases lack service records
2. Compare price per CFM across models (GBP450-GBP620 is typical)
3. Ask suppliers about Transport for London (TfL) compliance if working in the capital

## Market Trends Affecting Prices

The UK's used compressor market grew 10.7% in 2023 (Source: Construction Equipment Association). Rising demand comes from:

- Infrastructure projects like HS2 requiring mobile air supply
- Brexit-related import delays on new machinery
- Government incentives for sustainable equipment reuse

## How to Get Instant Quotes

Top UK suppliers like UsedCompressors4Hire and PlantTracker offer same-day price quotations. For the best deals:

- (1) Specify required CFM and wheel configuration
- (2) Upload your project's postcode for delivery estimates
- (3) Request VAT-certified invoices to claim tax benefits

Remember: A well-maintained second hand four-wheel screw diesel compressor can deliver 70-80% of new machine performance at half the cost. Compare quotes today and secure your cost-effective solution.
