

# Second Hand Four Wheel Screw Diesel Compressor for Sale in China 2025: Price List, Quotation & Buying Guide

## Second Hand Four Wheel Screw Diesel Compressor for Sale in China 2025: Price List, Quotation & Buying Guide

Looking for affordable heavy machinery? Second hand four wheel screw diesel compressors are in hot demand across China's construction and mining sectors. With prices 30-50% lower than new models, these compressors help businesses cut costs while delivering reliable performance.

### Why Buy Used Compressors in China?

China accounts for 45% of global used heavy equipment sales (Statista 2024), driven by massive infrastructure projects and flexible export policies. But here's the problem: buyers often struggle to find trusted suppliers or verify machine conditions remotely. A German construction firm recently shared how they received a faulty compressor with mismatched horsepower - a \$7,000 lesson.

### Key Costs & Market Trends

The average price of second hand four wheel screw diesel compressors in China ranges from \$5,000 to \$15,000, depending on:

- Engine hours (under 2,000 hours preferred)
- Brand (Atlas Copco vs Chinese brands like ShanTui)
- Export certification fees

### How to Get the Best Supplier Deals

Follow this PAS formula to avoid costly mistakes:

**Problem:** 60% of used compressors sold online have incomplete maintenance records.

**Agitate:** Hidden repairs can add \$3,200+ to your total cost within 6 months.

**Solve:** Work with verified suppliers offering:

- On-site inspection services
- 6-12 month warranties
- ROI analysis reports

### Real Case: Mining Company Saves 34%

An Australian mining contractor secured a 2019-model screw diesel compressor for \$11,200 (original price: \$17,000) through Shanghai-based supplier HeavyMachPro. They saved \$2,300 using China's VAT rebate program for eco-friendly equipment.

## 2025 Price Factors & Quotation Tips

Prices are rising 4-6% yearly due to diesel engine emission upgrades. To lock in 2024 rates:

Request FOB Shanghai quotes (not CIF) to control shipping costs

Compare price per work hour instead of upfront cost

Ask for spare part bundles (e.g., "free air filters for 1 year")

Top platforms like Made-in-China now offer live video verification - a game-changer to check compressor conditions in real time. With China pushing "green industry" policies, expect more tax incentives for energy-efficient used machinery through 2026.
