

Second Hand Four-Wheel Screw Diesel Compressor for Sale in Mexico: 2025 Price List, Quotation & Buying Guide

Second Hand Four-Wheel Screw Diesel Compressor for Sale in Mexico: 2025 Price List, Quotation & Buying Guide

Need reliable air power for construction, mining, or industrial projects in Mexico? Second-hand four-wheel screw diesel compressors offer 30-50% cost savings compared to new units. With Mexico's industrial sector growing at 4.2% annually (INEGI 2024), smart buyers are turning to refurbished equipment to maximize ROI. Here's how to navigate prices, suppliers, and pitfalls in Mexico's booming used compressor market.

Why Mexico's Used Compressor Market Is Booming

Three factors drive demand for second-hand diesel screw compressors:

- Government infrastructure projects requiring portable compressed air solutions
- Rising energy costs making newer "eco-friendly" compressors less attractive
- Flood of China-made compressors entering the market through US/Mexico trade deals

Price Benchmarks: What to Expect in 2025

Current average prices for used four-wheel screw diesel compressors in Mexico:

- Small units (10-20 CFM): \$8,000-\$12,000 USD
- Mid-size (30-60 CFM): \$15,000-\$28,000 USD
- Industrial (80+ CFM): \$32,000-\$45,000 USD

Prices vary 20-35% based on brand (Atlas Copco vs Chinese clones), service history, and import taxes.

Real-World Case: Monterrey Construction Firm Saves 30%

Grupo Rizo (Monterrey) needed two 40 CFM compressors for highway projects. New units from Germany: \$74,000. They sourced refurbished screw diesel compressors from Texas through a Nuevo Leon dealer:

- 2018 Atlas Copco XAS 47 JD: \$21,500
- 2020 Sullair 1850QDV: \$24,900
- Total savings vs new: \$27,600 + 18% tax rebate

3 Red Flags When Buying Used Compressors

Mexico City buyer Juan Martinez warns: "I almost bought a flood-damaged unit from Veracruz. Always check:

Second Hand Four-Wheel Screw Diesel Compressor for Sale in Mexico: 2025 Price List, Quotation & Buying Guide

Engine hours vs manufacturer's service intervals
Import documentation (NOM certification is mandatory)
After-sales support within Mexico"

How to Get Competitive Quotations

Top Mexican suppliers like Maquinaria Diesel Leon offer:

30-day warranty on refurbished units
Free delivery within 300 km of Guadalajara
Trade-in deals for older piston compressors

Pro tip: Ask for price per operating hour calculations. A \$20k used compressor running 2,000 hours/year often beats a \$35k new unit in ROI.

With Mexico's energy reform pushing businesses toward diesel alternatives, certified pre-owned four-wheel screw compressors offer both immediate savings and long-term reliability. Start comparing supplier quotes today--many dealers now offer WhatsApp-based consultations in English and Spanish.
