

Second Hand Four-Wheel Screw Diesel Compressor for Sale in Nigeria: 2025 Price List & Buying Guide

Second Hand Four-Wheel Screw Diesel Compressor for Sale in Nigeria: 2025 Price List & Buying Guide

Need a reliable second-hand four-wheel screw diesel compressor in Nigeria without breaking the bank? You're not alone. Over 60% of construction and mining firms in West Africa now opt for refurbished equipment to cut costs. But finding the right balance between price in Nigeria and machine quality feels like searching for gold in muddy water. Let's fix that.

Why the Rush for Second-Hand Compressors?

Nigeria's infrastructure boom has spiked demand for air compressors - new units from China or Germany cost ₦15M-₦35M. Meanwhile, tested second-hand screw diesel compressors sell for ₦6M-₦12M. Last year, Lagos-based Dangote Group saved ₦200M by buying 18 refurbished units instead of new ones.

The 3 Cost Traps You Must Avoid

Hidden repair costs: 70% of buyers pay 40% extra on engine overhauls within 6 months

Fake mileage claims: Always demand ECU data logs

Missing parts: Verify if the 4-wheel drive system works BEFORE paying

2025 Price Trends: What Sellers Won't Tell You

Prices dropped 12% since 2024 due to increased imports of used screw diesel compressors from South Africa and UAE. A 2018 Atlas Copco XAS 376 typically costs ₦8.2M-₦9.5M now. However, newer models (2020+) with
