

Second Hand Four-Wheel Screw Diesel Compressor for Sale: Denmark Price List 2024 & ROI Guide

Second Hand Four-Wheel Screw Diesel Compressor for Sale: Denmark Price List 2024 & ROI Guide

Need a second hand four-wheel screw diesel compressor in Denmark? Bargain hunters and contractors are saving 30-50% on quality used equipment while Denmark's construction sector grows at 3.8% annually. This guide breaks down price per piece ranges, trusted suppliers, and how to avoid costly mistakes.

Why Denmark's Construction Boom Demands Affordable Solutions

Over 72% of Danish contractors now consider used machinery due to:

New compressor costs soaring 22% since 2022

EU emission rules pushing older diesel models into resale markets

6-month wait times for new units from Germany/China

Real Market Prices: What You'll Actually Pay

A 2024 survey shows these price in Denmark ranges for working condition units:

Price per piece: EUR15,000-EUR25,000

Key factors: Hours logged (aim below 4,000), maintenance history, and CE certification status. Watch for "grey imports" - 18% of used compressors lack proper EU compliance documents.

Smart Buying Guide: 3 Steps to Maximum ROI

Case Study: A Copenhagen drilling firm saved EUR11,200 by purchasing a 2020 Atlas Copco XAHS 367 through our verified suppliers list.

Get instant quotations from 3+ suppliers - prices vary 40% across Jutland vs Zealand

Verify hydraulic system hours (critical for four-wheel models)

Request Danish-language service records

Supplier Deals You Can't Miss

Top-rated vendors like Aalborg Machinery Exchange currently offer:

Free 90-day parts warranty on select units

0% VAT deals for export to Sweden/Norway

Price matching on identical models from German resellers

2024 Trend Alert: Rising Diesel Costs Demand Efficiency

Second Hand Four-Wheel Screw Diesel Compressor for Sale: Denmark Price List 2024 & ROI Guide

With Denmark's diesel price at EUR1.88/L (23% above EU average), focus on compressors with:

Screw type technology (18% better fuel efficiency vs piston models)

Smart controllers - reduces idle time by 35%

Properly sized tanks (200-300L ideal for most Danish job sites)
