

Second Hand Four-Wheel Screw Diesel Compressors for Sale in Greece: 2025 Price List, Quotes & Buying Guide

Second Hand Four-Wheel Screw Diesel Compressors for Sale in Greece: 2025 Price List, Quotes & Buying Guide

Why Businesses Choose Second-Hand Four-Wheel Screw Diesel Compressors

Need reliable air compression on rough terrain? Second-hand four-wheel screw diesel compressors are selling fast in Greece, with prices 30-50% lower than new models. Construction firms in Athens and Thessaloniki report saving EUR8,000-15,000 per unit. Yet many buyers struggle to find trusted suppliers or avoid hidden repair costs.

Current Market Prices in Greece (2025 Data)

Recent deals show these average prices for used screw diesel compressors:

Small units (10-15 CFM): EUR6,500-9,200

Mid-size units (20-30 CFM): EUR11,000-16,800

Mining-grade models (35+ CFM): EUR18,500-25,000

Chinese-made machines cost 15-20% less than German brands like Atlas Copco. But European models dominate Greece's rental markets due to better service networks.

3 Critical Mistakes to Avoid When Buying

A Crete-based contractor recently paid EUR12,000 for a second hand four-wheel diesel compressor, only to spend EUR3,200 replacing worn screws. These slip-ups cause most buyer regrets:

Ignoring service history logs

Not testing hydraulic systems onsite

Choosing price over warranty terms

Smart Buyer Case Study: Thessaloniki Port Project

An infrastructure company saved 38% by purchasing two used Kaeser M30 diesel compressors from a certified German seller. Key steps:

Requested moisture test reports

Compared 5 supplier quotations

Negotiated 6-month warranty coverage

Total savings vs new units: EUR27,600. ROI achieved in 8 months through project rentals.

Second Hand Four-Wheel Screw Diesel Compressors for Sale in Greece: 2025 Price List, Quotes & Buying Guide

Where to Get Trusted Quotes in Greece

Top platforms for four-wheel screw compressor price comparisons:

1. Local dealers: Hellenic Machinery Hub (Athens) offers free inspections
2. EU suppliers: MachineryLine ships to Patras within 10 days
3. Auctions: Check ELGA's April 2025 listings for repossessed units

Pro Tip: Always Ask for These Documents

Before finalizing any second-hand diesel compressor deal in Greece, demand:

- Engine hour meter certification
- Oil contamination analysis
- EU emission compliance proof (Stage III/V)

With Greece's construction sector growing 4.2% YoY (Eurostat 2025), demand for rugged four-wheel screw compressors keeps rising. A mining contractor in Evia just secured six refurbished units at EUR14,300 each - 22% below 2024 average prices. Ready to compare quotes? Most suppliers respond within 24 hours.
