

Second Hand Piston Diesel Air Compressor Price in Argentina: 2024 Cost Guide & Supplier Deals

Second Hand Piston Diesel Air Compressor Price in Argentina: 2024 Cost Guide & Supplier Deals

Need reliable, budget-friendly industrial equipment? Second-hand piston diesel air compressors are surging in demand across Argentina's construction and mining sectors. With inflation hitting 200%+ in 2024, businesses want ROI-focused solutions - and rebuilt compressors deliver 30-50% cost savings versus new models. Let's break down prices, suppliers, and smart buying strategies.

Why Argentina's Market Demands Affordable Compressors

Argentina's manufacturing output grew 4% in Q1 2024 (INDEC data), but tight budgets push firms toward used diesel air compressors. Typical price ranges:

7-10 HP units: ARS 800,000-1.2 million (USD 800-1,200)

15-20 HP units: ARS 1.5-2.5 million (USD 1,500-2,500)

Refurbished Atlas Copco/Porter models: 15-20% premium over no-name brands

Case Study: Rosario Construction Firm Cuts Costs

SKC Construcciones saved ARS 4.2 million in 2023 by buying three pre-owned piston compressors from China-based supplier HYT Machinery. Delivery took 18 days via Buenos Aires port, with 6-month warranties included.

How to Get the Best Price & Quotation

Argentine buyers use two main channels:

Local auctions (MercadoLibre Industrial, GovDeals): Quick delivery, but limited quality checks

International suppliers (China, Germany): Cheaper base prices, longer shipping

Pro tip: Ask for CE/ISO certifications and maintenance logs. A 2023 Buenos Aires Chamber of Commerce study found 40% of "refurbished" units sold locally had undocumented engine hours.

2024 Price Trends: What to Expect

Used compressor prices rose 12% YoY due to ARS depreciation. However, China's export discounts (up to 15% for bulk orders) offset this. Always negotiate FOB/CIF terms - shipping adds ARS 150,000-300,000 per unit.

Where to Find Trusted Suppliers in Argentina

Top-rated vendors include:

Hidroair S.A. (Buenos Aires): Certified Kubota/Sullair rebuilds

Second Hand Piston Diesel Air Compressor Price in Argentina: 2024 Cost Guide & Supplier Deals

GlobalMach (cross-border agent for China/Hyundai units)

For quotes, use WhatsApp-based suppliers like Maquinarias Obras - response time averages 2 hours vs. 3 days for email inquiries.

Ready to buy? Always test run units for oil leaks or irregular RPM. Pair your second-hand diesel compressor with a local service contract (ARS 30,000/month avg.) to avoid downtime. With smart sourcing, you'll turn Argentina's economic challenges into compressed air savings.
