

Second Hand Piston Diesel Air Compressor for Sale in Colombia: 2025 Price List, Supplier Quotes & ROI Guide

Second Hand Piston Diesel Air Compressor for Sale in Colombia: 2025 Price List, Supplier Quotes & ROI Guide

Looking for a second hand piston diesel air compressor in Colombia? With construction and mining booming across the country - 8.3% GDP growth in 2023 - businesses need cost-effective power solutions. But new industrial compressors can drain \$15,000-\$30,000 from your budget. That's why savvy buyers are turning to high-quality used models at 40-60% lower prices. Let's break down what you need to know.

Why Second Hand Compressors Dominate Colombian Worksites

Colombia's infrastructure projects require reliable equipment without the upfront costs. A 2023 Statista report shows a 27% surge in demand for second hand industrial machinery across Latin America. For diesel compressors specifically:

Average price per piece of used piston models: \$6,500-\$11,000 (vs. \$18,000+ for new)

Top suppliers in Medellin and Bogota report 3-month ROI for buyers

Chinese-made rebuilt units now cover 58% of local market share

Case Study: Quarry Operator Cuts Energy Costs by 34%

MineriaCol S.A. replaced their 2018 screw compressor with a second-hand diesel piston model from a German exporter. Results:

Paid \$8,200 (vs. \$24,000 for new equivalent)

Reduced fuel consumption to 3.1 liters/hour

Annual savings: \$13,700

2025 Price Trends: What to Expect

Global steel prices and Colombia's diesel compressor import tax (currently 10%) will shape costs. Our latest price list comparison shows:
