

Second Hand Piston Diesel Air Compressor for Sale in Nigeria: 2024 Price List, Quotation & Buying Guide

Second Hand Piston Diesel Air Compressor for Sale in Nigeria: 2024 Price List, Quotation & Buying Guide

Need reliable compressed air but tight on budget? Second-hand piston diesel air compressor price in Nigeria could be your game-changer. This guide cuts through the noise to show how businesses slash costs by 40-60% buying used equipment. Let's unpack real prices, trusted suppliers, and smart ROI strategies.

Why Nigeria's Construction Sector Chooses Used Compressors

Over 60% of Nigerian contractors now opt for refurbished diesel air compressors. Here's why: Brand-new units from China or Germany cost ₦2.5M-₦7M (\$3,000-\$8,300), while quality second-hand models sell for ₦800,000-₦2.8M (\$950-\$3,300). For small quarries in Abuja or Lagos workshops, this cost difference directly impacts profit margins.

2024 Price Benchmarks (₦)

Single-phase 10CFM: ₦800,000-₦1.2M

Industrial 30CFM: ₦1.8M-₦2.8M

Heavy-duty 60CFM: ₦3M+ (fully refurbished)

How to Avoid "Lagos Lemon" Scams

Three critical checks before paying:

Ask for compression test results (PSI must match specs)

Verify replacement parts availability (Atlas Copco/Sullair preferred)

Confirm seller's after-sales service (minimum 3-month warranty)

The Port Harcourt Case Study

A drilling company saved ₦4.7M buying two used Ingersoll Rand compressors through verified dealers. Key ROI? Full ROI achieved in 9 months through government road projects. Smart move: They prioritized EU-refurbished units (Germany) over cheaper China imports.

Where to Get Competitive Quotations

Top platforms offering wholesale deals:

1. Jiji - 200+ verified listings (avg. ₦1.1M)
2. Apapa Machinery Hub - Govt-certified refurbishers
3. TradeKey Africa - Direct imports from Turkey

Current market trend: Demand for Kubota-powered models jumped 45% since Q1 2024. Why? Better fuel

efficiency (3.8L/hr vs older models' 5.2L). Always compare price per kWh output - some "cheap" units cost more long-term.

Final tip: Join the Used Machinery Sellers Association of Nigeria (UMSAN) WhatsApp group for flash deals. Last week, a Birmingham-refurbished Atlas Copco XAS 37 went for ₦1.9M - 22% below market rate. Act fast, but verify twice. Your power solution might be three clicks away.
