

Second Hand Piston Electric Air Compressor Price in Australia 2024: Cost Guide, Quotations & Top Suppliers

Second Hand Piston Electric Air Compressor Price in Australia 2024: Cost Guide, Quotations & Top Suppliers

Need to buy a reliable second hand piston electric air compressor in Australia without burning cash? You're not alone. Over 60% of small workshops and contractors now prioritize refurbished equipment to slash upfront costs. Let's break down current prices, smart buying tactics, and trusted suppliers.

Why Businesses Choose Second Hand Piston Compressors

New industrial compressors cost between \$3,000-\$15,000 AUD - a huge barrier for startups. Meanwhile, second hand piston electric air compressors sell for 30-60% less. Take Brisbane Auto Repairs: they saved \$4,200 AUD buying a reconditioned 7.5kW unit instead of new. "We needed quick ROI," says owner Mark. "The 12-month warranty sealed the deal."

Price Breakdown: What You'll Pay in 2024

Second hand prices vary by condition and capacity:

3-5HP (2.2-3.7kW): \$500-\$1,200 AUD

7.5-10HP (5.5-7.5kW): \$1,800-\$3,000 AUD

15+HP (11kW+): \$3,500+ AUD

Pro tip: Imported units from China often cost 20% less than European brands like ABAC or Atlas Copco. But check if spare parts are available locally.

3-Step Buying Guide for Maximum Savings

1. Request quotations from at least 3 suppliers - Sydney-based RecoAir usually offers 10% discounts for bulk orders.
2. Inspect oil leaks, belt condition, and hour meters (ideal: under 2,000 runtime hours).
3. Confirm warranty terms - 6 months is standard, but some give 24 months on rebuilt motors.

Market Trends Driving Down Prices

Australia's push for energy-efficient models has flooded the market with used units. The NSW Gov's Net Zero 2050 plan even offers rebates when businesses upgrade to screw compressors. Result? More sellers competing - last quarter saw average prices per piece drop 8% in Melbourne.

Case study: Perth Mining Co. purchased 12 used compressors via online auction, cutting fleet costs by \$43,000 AUD

Emerging suppliers: Websites like Machines4U now list 400+ verified options nationwide

Second Hand Piston Electric Air Compressor Price in Australia 2024: Cost Guide, Quotations & Top Suppliers

Ready to compare second hand piston electric air compressor prices in Australia? Always check CFM ratings against your needs. A 20 CFM model might seem cheap, but it won't handle sandblasting. For welding shops, aim for 8-12 bar pressure models. Most suppliers provide free delivery within 50km - just ask when negotiating your quotation.
