

Second Hand Piston Electric Air Compressor for Sale in Portugal 2024: Price List, Quotation & Buying Guide

Second Hand Piston Electric Air Compressor for Sale in Portugal 2024: Price List, Quotation & Buying Guide

Need a reliable second hand piston electric air compressor in Portugal but worried about inflated costs or hidden risks? You're not alone. Over 60% of Portuguese industrial buyers now opt for pre-owned equipment to cut expenses. This guide reveals updated price per piece ranges, supplier deals, and how to secure the best ROI on your purchase.

Current Market Prices for Second Hand Piston Electric Air Compressors in Portugal

Portugal's used industrial equipment market grew 20% last year, driven by manufacturers upgrading to newer models. Here's what you'll pay for second hand piston compressors today:

5-10 HP models: EUR800-EUR2,200

15-25 HP units: EUR2,500-EUR4,800

30+ HP industrial systems: EUR5,000-EUR12,000

These prices vary based on condition, brand (Atlas Copco or Bambi units cost 15-30% more), and operating hours. A Lisbon construction firm saved EUR6,200 last month buying a lightly used 20 HP compressor through verified wholesale channels.

Why Portuguese Buyers Choose Second Hand Units

With energy costs rising 22% in Portugal since 2022, efficient piston electric air compressors deliver fast ROI. A Porto auto workshop recouped their EUR3,400 investment in 8 months through reduced downtime. Key benefits:

50-70% cheaper than new models

Immediate availability (new compressors face 12-16 week lead times)

Tested performance data available

Supplier Strategy: Where to Find Trusted Deals

Portugal's top 3 resellers offer condition certificates and 6-month warranties. For bulk quotation requests, check:

Certified European equipment brokers in Lisbon and Porto

German surplus stock auctions (30-40% below local price lists)

Chinese factory refurbishment programs with export discounts

2024 Buying Checklist: Avoid Costly Mistakes

Always verify these four points before buying used compressors:

Service history documents (minimum 2 years available)

Compression efficiency tests ($\geq 85\%$ of original capacity)

EU compliance certificates

Return policies for defective units

Aveiro-based metalworker Carlos Silva told us: "I compared six suppliers before finding a 2019 15HP compressor for EUR2,100. The buying guide from my trade union helped me negotiate free shipping." Most Portuguese dealers now provide price per kWh calculations to prove energy savings potential. Contact local sellers this week to lock in Q3 inventory clearances - new stock arrives September 5th.
