

Second Hand Rock Drill Price in Canada 2025: Cost List, Supplier Deals & Buying Guide

Second Hand Rock Drill Price in Canada 2025: Cost List, Supplier Deals & Buying Guide

Why Canada's Used Rock Drill Market Is Booming (and What It Costs)

If you're in Canada and need heavy equipment for mining or construction projects, second-hand rock drills could save you 30-60% vs new units. But here's the catch: Prices jumped 18% last year due to high demand from Alberta's oil sands and Ontario tunnel projects. Many buyers get stuck between risky private sellers and overpriced dealerships.

The Hidden Costs of Cheap Used Rock Drills

A Calgary contractor learned this the hard way. They bought a "barely used" Atlas Copco drill for \$12,000 from an online ad - only to spend another \$8,200 on hydraulic repairs within 3 months. That's why price in Canada isn't just about the sticker number. You need to know:

Average 2024 prices: \$9,800-\$28,500 for functional used units

Certified refurbished models (+12-35% cost)

Supplier warranties (0-6 months typical)

Where to Find Trusted Sellers & Best Deals

Top suppliers like Toromont Cat and Finning Canada now offer used rock drills with full service histories. For example: A 2021 Sandvik DX700 recently sold for \$23,900 at Ritchie Bros' Edmonton auction - 40% below new price, with 90-day parts coverage. Pro tip: Check equipment return policies. Many Quebec dealers allow 7-day testing periods.

Your 5-Step Buying Checklist

Follow this guide to avoid money pits:

Verify hourly meter readings vs maintenance records

Test drilling force and rotation stability onsite

Compare price per piece from 3+ suppliers

Request digital inspection reports (look for CBCA members)

Negotiate transport - some BC companies offer free shipping

2025 Price Trends: China's Impact on Canadian Market

Used drill prices are dropping slightly (2-5% predicted) as more Chinese-made rigs enter Canada. But be cautious: While brands like SANY offer lower quotation rates (\$7,500-\$18,000), their resale value drops faster than European models. For long-term ROI, consider refurbished Epiroc or Boart Longyear units - they dominate 67% of Canada's underground mining sector.

Second Hand Rock Drill Price in Canada 2025: Cost List, Supplier Deals & Buying Guide

Toronto's Urban Excavation Corp. switched to certified used drills last year, cutting equipment costs by \$140,000 annually. Their secret? Buying through Ontario's OETIO certified vendors network during seasonal inventory clearances. Whether you need a single drill or wholesale fleet solutions, timing your purchase around Canada's spring construction ramp-up could save thousands.
