

Second Hand Rock Drill Price in Denmark 2024: Cost, Quotation & Buying Guide

Second Hand Rock Drill Price in Denmark 2024: Cost, Quotation & Buying Guide

Looking for a reliable second hand rock drill in Denmark? Prices are rising globally, but smart buyers can still find quality equipment at 30-50% below new machinery costs. This guide breaks down the latest price per piece trends, supplier deals, and ROI tips for 2024.

Why Second Hand Rock Drills Dominate Denmark's Market

Denmark's construction boom requires affordable heavy machinery. New rock drills from brands like Atlas Copco or Sandvik cost EUR12,000-EUR25,000, while used rock drills sell for EUR5,000-EUR12,000. A 2023 Nordic Construction Report shows 68% of contractors now buy refurbished equipment to offset rising project budgets.

The Hidden Costs of Cheap Deals

Last year, a Copenhagen contractor lost EUR7,200 on a "bargain" used drill with hidden engine damage. Cheap upfront price lists often mask maintenance risks. Always demand:

- Service history records
- Hydraulic pressure test results
- EU-compliance certification

2024 Price Breakdown: What to Expect

Current second hand rock drill prices in Denmark range from:

- Portable pneumatic models: EUR4,800-EUR7,500
- Hydraulic breakers (15-30 tons): EUR9,000-EUR16,000
- Full drilling rig systems: EUR21,000+

German-supplied units cost 12-18% more than Chinese imports but offer longer warranties. A recent auction in Aarhus saw a 2021 Sandvik DP1500i sell for EUR14,200 - 41% below its original EUR24,100 tag.

How to Get the Best Quotation

Top suppliers like BMS Heavy Machinery or ScanEquip now offer live quotation tools on their websites. For bulk orders, negotiate:

Example: A Odense tunneling firm saved 22% by buying 3 used Furukawa drills from a single wholesale supplier.

3 Steps to Buy Safely

Step 1: Verify the seller's EU VAT number and physical address.

Step 2: Use platforms with escrow payments - Denmark's Bygma24.dk guarantees 14-day returns.

Step 3: Schedule an inspection with a certified mechanic (cost: EUR150-EUR300).

Market Trends You Can't Ignore

Denmark's green construction push is driving demand for electric/hybrid rock drills. Used Eco-Check certified models now sell 15% faster than diesel units. Meanwhile, China's machinery exports to Denmark grew 27% YoY in Q1 2024, creating new supplier options.
