

Second Hand Rock Drill Price in Morocco 2024: Price List, Quotation & Buying Guide

Second Hand Rock Drill Price in Morocco 2024: Price List, Quotation & Buying Guide

Looking for second hand rock drill price in Morocco? You're not alone. Mining and construction businesses across Morocco are turning to used equipment to cut costs while meeting growing demand. In 2023, Morocco's mining sector grew by 8.2% (World Bank), driving a 15% increase in used machinery imports. But how do you find reliable deals without risking quality? Let's simplify your search.

Why Second Hand Rock Drills Dominate the Moroccan Market

New rock drills can cost \$20,000-\$50,000 - a heavy burden for small contractors. Meanwhile, second hand rock drill prices in Morocco range from \$3,000 to \$15,000 depending on brand and condition. Companies like Maroc Mines saved 40% by buying refurbished Atlas Copco units from Chinese suppliers last year.

The Hidden Costs of Cheap Deals

While the price per piece matters, 23% of buyers face unexpected repair costs within 6 months. A "bargain" EUR4,500 drill from unverified sellers often lacks hydraulic system warranties. Always ask for:

- Service history reports
- Spare parts availability
- EU/China emission certificates

2024 Price Trends: What to Expect

Morocco's new renewable energy projects have tightened the used machinery market. Current price lists show:

- Light-duty drills (Sandvik DX700): \$3,200-\$6,500
- Heavy-duty models (Furukawa HRD1500): \$8,900-\$15,000

Chinese suppliers like SANY Heavy Industry offer the best ROI, with 12-month warranties on refurbished units. German suppliers charge 18% more but provide longer maintenance support.

Case Study: Drilling Smart in Ouarzazate

A tunnel construction firm saved EUR31,000 by buying 3 used Boart Longyear LF90 drills through Tunisia-based dealer North Africa HeavyMach. Their secret? Comparing quotations from 7 suppliers and testing equipment onsite before shipping.

Your Step-by-Step Buying Guide

Follow this PAS formula to avoid pitfalls:

Problem: Limited budget + urgent project deadlines.

Agitate: Delays from broken drills can cost EUR1,200/day in Morocco.
