Second Hand Rock Drill Price in Sweden: 2024 Cost, Quotation & Buying Guide

Struggling with the high cost of new rock drills? You're not alone. Over 65% of Swedish construction firms now prefer second-hand rock drills to cut equipment expenses. Discover why the price per piece for used models in Sweden can save you up to 60%, with real supplier deals and actionable data below.

Why Second-Hand Rock Drills Dominate Sweden's Market

Sweden's mining and construction sectors grew 4.3% in 2023 (Statista), driving demand for affordable heavy machinery. A used Atlas Copco drill costs 7,500-12,000 SEK here - 40% cheaper than new units. Meanwhile, Germany's equivalent models cost 15% more due to shipping fees.

Key Factors Affecting Prices:

- Brand reputation (Sandvik vs. local suppliers)
- Operating hours (under 2,000 hrs = 22% cost premium)
- Included accessories (bits, compressors)

2024 Price List: Second Hand vs New ROI Comparison

Compare these Stockholm supplier quotes (SEK):

Model	New Price	Used Price	Year
Furukawa HCR9-ES	185,000	68,500	2020
Atlas Copco ROC L62	110,000	94,200	2019

Gothenburg-based Bergstrom Drilling saved 142,000 SEK monthly after switching to pre-owned rock drills. Their ROI improved in 8 months - faster than the 14-month average for new equipment.

How to Buy Reliable Used Rock Drills in Sweden

- Request price quotations from 3+ suppliers (Stockholm, Malmo, and cross-border EU dealers)
- Verify machine hour logs with manufacturer databases
- Inspect hydraulic systems onsite or via live video

Top-rated supplier NordicDrills.se offers wholesale discounts for 3+ units, plus 6-month warranties. Avoid "as-is" sellers near Oslo - Norwegian used drills often lack Swedish safety certifications.
