

Second Hand Screw Diesel Air Compressor Price in Argentina 2024: Updated Cost List, Supplier Deals & ROI Guide

Second Hand Screw Diesel Air Compressor Price in Argentina 2024: Updated Cost List, Supplier Deals & ROI Guide

Why Businesses Are Switching to Used Equipment

Did you know Argentina's construction sector saved over \$1.2 million last year by buying second-hand screw diesel air compressors? With new models costing \$18,000-\$35,000, companies like Buenos Aires-based Roca Construcciones turned to refurbished units at 40-60% lower prices. This shift isn't just about budgets - it's survival in a market where diesel prices jumped 22% in 2023.

Current Price Range (June 2024 Update)

Here's what you'll pay for quality used screw diesel compressors in Argentina:

- 15-20 CFM models: \$7,200-\$11,500
- 30-50 CFM heavy-duty units: \$12,800-\$19,400
- Customized mining compressors: Up to \$25,000

Chinese suppliers like Shanghai Denair now dominate 68% of Argentina's used equipment imports, offering 2-year warranties. Local dealers counter with faster delivery - but charge 12-18% more.

3 Steps to Avoid Costly Mistakes

Problem: Last month, a Rosario factory lost \$8,700 on a "refurbished" compressor that failed during winter operations. **Solution:** Our 2024 buying guide prevents such disasters:

1. Verify Operational Hours & Maintenance

Never buy without checking:

- Engine hour meter (under 4,000 hrs preferred)
- Oil change records (every 500 hrs minimum)
- Air end rebuild history

2. Calculate Real ROI

A \$14,000 used Atlas Copco GA90 from Germany delivers 86% of new unit performance. At Argentina's average electricity rates (\$0.18/kWh), you'll break even in 14 months versus buying new.

Where to Get Reliable Quotes

Top suppliers for Argentina-bound equipment:

Second Hand Screw Diesel Air Compressor Price in Argentina 2024: Updated Cost List, Supplier Deals & ROI Guide

Local: Ferreteria Industrial Santa Fe (3 locations)

Import: Alibaba Trade Assurance partners

Auctions: MercadoLibre Industrial Week (July 15-21)

Pro Tip: Ask for diesel compatibility certificates - Argentina's low-sulfur diesel (max 50ppm) requires specific injectors.

Final Checklist Before Purchase

Smart buyers always:

? Test with actual workload for 30+ minutes

? Confirm parts availability (Atlas Copco & Ingersoll Rand have best networks)

? Negotiate 90-day warranty minimum

With Argentina's infrastructure projects requiring 1,200+ compressors by 2025, now's the time to lock in prices. Check our updated price list page for live quotes from verified suppliers.
