

Second Hand Screw Diesel Air Compressor Price in China 2024: Price List, Quotes & Supplier Deals

Second Hand Screw Diesel Air Compressor Price in China 2024: Price List, Quotes & Supplier Deals

Are you hunting for affordable second hand screw diesel air compressors in China? With global industrial demand rising, China's refurbished compressor market grew 18% in 2023 alone. Here's how to get the best ROI without breaking the bank.

Why China's Used Compressor Market Is Booming

Over 6,500 second-hand screw diesel air compressors were exported from China to Africa and Southeast Asia last year. Three factors fuel this trend:

- China's push for carbon-neutral factories (replacing older equipment)

- 40-60% cost savings vs. new units

- Improved quality control on refurbished models

Real-World Case: Germany's Smart Buy

A Bavarian auto parts factory cut costs by 54% purchasing a refurbished 30kW diesel screw compressor from Shanghai. Maintenance records showed only 2,000 operating hours - equivalent to 1.5 years of light use.

2024 Price List: What You'll Actually Pay

Typical second hand screw diesel air compressor prices in China range from:

- \$5,000-\$12,000 for 20-40HP models

- \$13,000-\$25,000 for 50-100HP industrial units

Compare that to new compressors: A 75HP Atlas Copco diesel model costs \$38,000 new vs. \$19,500 for a certified used unit with 2-year warranty.

3 Red Flags When Buying Used Compressors

Always ask suppliers for:

- Hour meter verification (under 8,000 hours preferred)

- Original manufacturer certifications

- Third-party pressure test reports

How Shenzhen Buyers Got Scammed - And How You Won't

In 2023, 12 Malaysian companies lost \$320K total on compressors with tampered hour meters. Reputable suppliers like Guangzhou CompressNow provide:

Top Chinese suppliers offer wholesale prices for bulk orders:

5-10 units: 8-12% discount

10+ units: Negotiate FOB terms

What's Next?

The China Used Machinery Association predicts a 22% drop in screw compressor prices by Q3 2024 as more factories upgrade equipment. But act fast - high-demand models (like Ingersoll Rand 75kW units) sell within 72 hours of listing.

Ready to compare second hand screw diesel air compressor prices in China? Contact verified suppliers through Canton Fair's online platform or visit machinery hubs in Zhejiang province. Pro tip: Always request CIF quotes - port fees add 6-9% to final costs.
