

Second Hand Screw Diesel Air Compressor Price in Japan: 2025 Buyers' Guide with Cost Analysis & Supplier Deals

Second Hand Screw Diesel Air Compressor Price in Japan: 2025 Buyers' Guide with Cost Analysis & Supplier Deals

Why Japanese Buyers Are Switching to Pre-Owned Diesel Compressors

New screw diesel air compressors cost JPY4-12 million in Japan. But what if you could slash equipment costs by 65%? Construction firms and small factories across Osaka and Tokyo are discovering affordable power solutions through second-hand screw diesel air compressors. Local market data shows a 12% annual growth in used industrial equipment sales since 2023.

Price Shock: New vs. Second-Hand Market

A 2024 survey of 87 Japanese suppliers reveals:

New 250 CFM models: JPY7.8M average price

Refurbished units: JPY2.2M-JPY3.5M

ROI improvement: 40% faster payback period

Kobe-based Sato Manufacturing saved JPY5.3M by purchasing two used screw-type diesel compressors from certified Osaka dealers. "We upgraded equipment without draining cash reserves," says project manager Riku Takahashi.

2025 Price Trends & Smart Buying Strategies

Current second hand screw diesel air compressor prices in Japan range:

Portable units (100-150 CFM): JPY1.1M-JPY2.4M

Industrial models (200-300 CFM): JPY2.8M-JPY4.6M

Customized systems: Quotation required

Major suppliers like Tokyo Industrial Machinery and China's Sinocmp now offer hybrid deals: refurbished compressors with new parts warranties. The Tokyo government's green equipment subsidy (up to JPY500K) applies to certain low-emission used models.

3-Step Purchasing Process for Importers

1. Request multilingual quotations from Japanese and international suppliers
2. Verify machine history through IoT-enabled maintenance logs
3. Negotiate FOB pricing on port-ready units (Yokohama/Osaka)

A Nagoya auto parts supplier recently imported German-made diesel screw compressors through Shanghai traders at 38% below local prices. "We compared 11 quotes before selecting," notes purchasing director
