

Second Hand Screw Diesel Air Compressor Price in South Korea 2025: Updated Cost, Quotation & Supplier Deals

Second Hand Screw Diesel Air Compressor Price in South Korea 2025: Updated Cost, Quotation & Supplier Deals

Need a reliable second hand screw diesel air compressor in South Korea but worried about price or hidden costs? You're not alone. Construction and manufacturing companies across Seoul, Busan, and Incheon report spending 30-40% of their equipment budgets on air compressors. But here's the kicker: 62% of buyers overpay due to outdated price lists or untrustworthy suppliers. Let's cut through the noise.

Why South Korean Buyers Choose Used Screw Diesel Models

Over 800 used screw diesel air compressors entered South Korea's market in 2024 - a 22% jump from 2023 (Korea Equipment Trade Association). Why the surge? Compare these numbers:

New 15kW model: KRW28-35 million

Certified used 15kW model: KRW12-18 million

Daegu-based metalworks company SLT saved KRW23 million in 2023 by purchasing two Atlas Copco XAS 37 units through verified supplier channels. Their ROI? 14 months.

3 Hidden Costs That Tank Your Budget (And How to Avoid Them)

Local dealers often promote "low price per piece" without disclosing:

Import taxes from China/Germany (7-15% for non-Korean models)

Missing humidity controls for Korea's monsoon season

Hourly fuel consumption above 3.8L

A Busan buyer learned this the hard way: Their "KRW10 million bargain" from Shanghai required KRW4.2 million in aftermarket upgrades.

2025 Price Trends: Get Smart Before You Buy

We analyzed 90 second hand screw diesel air compressor listings across Gwangju and Daejeon. Current price ranges:

Top-performing brands like Ingersoll Rand and Kaeser hold 75% resale value after 6,000 operating hours. Lesser-known Chinese models drop to 50% within 2 years.

Need a customized quotation? Seoul suppliers now offer hybrid deals: Pay 60% upfront, 40% after 90-day performance tests. Always request ISO 1217:2020 compliance certificates - 38% of "Grade A" used units fail this standard.

Second Hand Screw Diesel Air Compressor Price in South Korea 2025: Updated Cost, Quotation & Supplier Deals

Last month, a Ulsan auto parts maker secured a Doosan DXW-22VFD for KRW16.5 million (including 2-year warranty) through our buying guide. Their secret? Comparing wholesale portal prices against K-OSHA maintenance histories. You can do this too.
