

Second Hand Screw Diesel Air Compressor for Sale 2025: Price List, Quotation & Buying Guide

Second Hand Screw Diesel Air Compressor for Sale 2025: Price List, Quotation & Buying Guide

Looking for a second hand screw diesel air compressor in Australia? You're not alone. Many mining, construction, and manufacturing businesses want to cut equipment costs without sacrificing performance. But outdated price lists, hidden defects, and unreliable suppliers can turn a "good deal" into a money pit. Let's break down the real costs, share 2025 market trends, and show you how to avoid common traps.

Why Second Hand Compressor Prices Vary Wildly (and How to Spot Scams)

A used screw diesel air compressor in Australia typically costs between AUD 5,000-15,000. But why such a big range? Three factors dominate:

Hours of use: Units under 5,000 work hours cost 30% more than those over 8,000

Brand origin: Chinese-made models (e.g., Sullair) sell 20% cheaper than German brands like Kaeser

Local demand: Mining regions like Western Australia see 15% higher prices than coastal cities

A recent case study: A Queensland quarry bought a "low-hour" Atlas Copco unit for AUD 12,500, only to spend AUD 3,200 fixing undisclosed piston wear. Always demand a certified maintenance history and third-party inspection.

2025 Price List: What's a Fair Deal?

Here's what you should pay in 2025 for popular models:

Atlas Copco XAS 185 (2019)AUD 8,200-11,000

Ingersoll Rand XP750 (2020)AUD 9,500-13,000

Doosan D18S (2018)AUD 6,800-9,400

Get Instant Quotes Without the Hassle

Top suppliers like Compressed Air Australia now offer same-day price quotations online. For wholesale deals (3+ units), Sydney-based traders report 8-12% bulk discounts. But always compare:

Check if freight from Melbourne/Perth is included

Ask about warranty extensions (some go up to 6 months)

Verify emissions compliance - new NSW rules start in Q3 2025

Supplier Secrets: Where the Pros Buy

Smart buyers target two channels:

Second Hand Screw Diesel Air Compressor for Sale 2025: Price List, Quotation & Buying Guide

1. Mine site clearances: Rio Tinto's 2024 equipment auction saw 22% below-market prices
2. Certified refurbishers: Companies like Perth Diesel Power add 6-month warranties at 5-8% cost premiums

Global trend alert: 40% of Australia's used compressors now come from Japan's liquidated construction firms - look for Yanmar or Hitachi models with bilingual service logs.

ROI Calculation: Will This Pay Off?

A working example: If a new compressor costs AUD 28,000 vs. a used one at AUD 11,000, your break-even point hits at 14 months (assuming 20 hrs/week use). Add \$200/month for potential repairs, and you still save 40% over 3 years.

Remember: Reliable second hand screw diesel air compressors exist. The key is combining current price data, local supplier checks, and a sharp eye for value. Start with at least three quotes - your wallet will thank you later.
