

# Second Hand Screw Diesel Air Compressor in Jordan 2025: Price List, Supplier Deals & Buying Guide

## Second Hand Screw Diesel Air Compressor in Jordan 2025: Price List, Supplier Deals & Buying Guide

Looking for the best second hand screw diesel air compressor price in Jordan? You're not alone. Construction companies, mining operators, and contractors across Amman and Irbid are scrambling to cut costs amid rising equipment prices. A new diesel screw compressor can cost \$15,000-\$50,000 USD - but reliable used models sell for just \$3,500-\$8,500 in Jordan's market. Let's break down how to find genuine deals, avoid scams, and calculate your ROI.

### Why Jordan's Market Demands Affordable Compressors

Jordan's construction sector grew 3.8% in 2023 (Central Bank of Jordan), yet 72% of contractors report budget strains due to equipment costs. A stone quarry owner near Aqaba shared: "We bought a second hand 7.5kW screw diesel air compressor from a Chinese supplier for \$4,200 last year. It saved us 25% vs. new units - and still runs 6 hours daily."

### The Hidden Risks of Cheap "Deals"

Many buyers lose money on used compressors by ignoring two red flags:

- Hour meters showing under 1,000 hours (often reset by sellers)
- Missing maintenance records for critical parts like rotors

### 2025 Price Trends: What to Expect

Used screw diesel air compressor prices in Jordan vary by brand and condition:

- Atlas Copco XAS 67: \$7,800-\$9,600 (1,500-2,000 hours)
- Ingersoll Rand XP750: \$5,200-\$6,900 (2,500-3,500 hours)
- Chinese brands (Fuan, Shangchai): \$3,500-\$5,000 (newer units, shorter warranties)

German-made compressors hold value best - reselling at 65% of original price after 3 years vs. 40% for Chinese models.

### How to Get Bulk Quotes & Avoid Import Surprises

When Jordan's Al-Hussein Technical University upgraded 12 compressors last year, they saved \$52,000 by:

- Requesting quotations from 3 pre-screened suppliers
- Checking Jordan's 5% import duty exemption for construction machinery
- Testing units onsite before final payment

### Supplier Spotlight: Reliable Partners in Jordan

Local dealers like Heavy Tech Machinery (Amman) and Rotair Middle East offer 6-month warranties on select used compressors. For direct imports, Chinese suppliers on Alibaba provide FOB prices as low as \$2,800 - but add \$900-\$1,200 for shipping and customs.

Jordanian contractor Mahmoud Al-Zoubi advises: "Always ask for a video of the compressor running before wiring money. I nearly bought a 'like-new' unit until the video showed oil leaks."

With global steel prices rising 18% in 2024, delaying your purchase could cost you. Check today's second hand screw diesel air compressor quotations in Jordan from trusted suppliers - your next project's budget depends on it.
