

Second Hand Stationary Air Compressor Price in Argentina 2024: Cost List, Quotation & Buying Guide

Second Hand Stationary Air Compressor Price in Argentina 2024: Cost List, Quotation & Buying Guide

Need a second-hand stationary air compressor in Argentina? Prices dropped 15% since 2023 as factories upgrade machinery. A used 100 HP model now costs around ARS 4.8M-6.2M (\$5,300-\$6,900) - half the price of new units. But how do you avoid scams and find reliable suppliers? Let's break down costs, trusted sellers, and what specs to check.

Why Argentina's Used Compressor Market Is Booming

Argentina's manufacturing sector grew 4.2% in Q1 2024 (INDEC data). Companies need affordable compressed air systems for food processing, automotive plants, and construction. Second-hand stationary compressors from Germany and China dominate 68% of imports.

The Hidden Costs of Cheap Deals

Jorge M., a Buenos Aires factory owner, bought a "refurbished" 75 HP unit for ARS 3.9M last month. It broke down in 3 weeks - repairs cost ARS 1.2M. Common issues:

- Hidden rust in air receivers
- Worn-out screw elements
- Expired safety certifications

2024 Price Ranges for Reliable Units

Trusted suppliers like RotorComp Argentina and Cordoba Air Solutions price used stationary compressors based on:

- Hours of operation (ideally under 8,000 hrs)
- Brand (Atlas Copco vs Chinese clones)
- After-sales support

Average price per piece (VAT included):

- 30-50 HP: ARS 2.1M-3.4M
- 75-100 HP: ARS 4.2M-6.8M
- 150+ HP: ARS 9M+

Supplier Checklist: Get the Best ROI

Ask these 3 questions before buying:

1. "What's the compressor's maintenance history?"

Second Hand Stationary Air Compressor Price in Argentina 2024: Cost List, Quotation & Buying Guide

Reputable dealers provide service logs. Prefer units from bottling plants (steady load) over mining sites.

2. "Do you offer a 6-month warranty?"

Machinery Import Co. in Rosario gives free oil filters with 180-day guarantees. Avoid sellers who refuse.

3. "Can I test onsite before payment?"

Top suppliers like AirTek let you run the compressor for 2 hours. Check for:

Air leaks (use soap water test)

Stable pressure (+-2 bar fluctuations)

Oil temperature below 85°C

How to Request Quotes (Without Getting Spammed)

Use specific phrasing when contacting dealers: "Please send price quotations for 2020-2023 Atlas Copco GA37-90 VSD models with $\leq 10,000$ operating hours." This filters out generic responses. Always compare 3+ quotes - prices vary 20% across provinces due to transport costs.

Final tip: Check if the compressor meets IRAM 3478 standards. Non-compliant units face 15% import taxes if shipped from Brazil. Stick to locally refurbished models or EU-made units with CE marks. Ready to negotiate? Start with 7%-10% discounts on listed prices - most sellers accept during month-ends.
