

Second Hand Stationary Air Compressor Price in Japan 2024: Cost List, Supplier Quotes & ROI Guide

Second Hand Stationary Air Compressor Price in Japan 2024: Cost List, Supplier Quotes & ROI Guide

Need second-hand stationary air compressors in Japan but stuck with new equipment prices? You're not alone. Over 67% of Japanese factories now consider used machinery to slash costs while maintaining productivity. Here's 2024 price data, supplier comparisons, and real ROI cases to turn your problem into profit.

Current Market Prices for Used Stationary Air Compressors in Japan

Japan's second-hand industrial equipment market grew 12% in 2023 (Japan Machinery Federation). For stationary compressors:

5-10HP units: JPY180,000-JPY450,000 (\$1,200-\$3,000)

15-30HP units: JPY550,000-JPY1.2M (\$3,700-\$8,000)

50HP+ units: JPY1.8M-JPY4.5M (\$12,000-\$30,000)

Prices vary 30-50% cheaper than new units from Germany or China. A Nagoya auto parts factory cut equipment costs by 42% using reconditioned Hitachi compressors last year.

Why Companies Choose Refurbished Models

Osaka-based Sato Manufacturing saved JPY3.7M (\$24,600) on a 25HP Kaeser compressor, achieving full ROI in 8 months. Their secret? Buying through certified suppliers offering:

6-12 month warranties

Original spare parts availability

Energy efficiency certification (Top Runner Program compliant)

3 Smart Ways to Buy Used Air Compressors in Japan

1 Auction Deals: Industrial Surplus Exchange Japan offers compressors from bankrupt factories at 60-70% discounts. Recent find: 2021 Atlas Copco GA37VSD sold for JPY2.1M vs. JPY6.8M new.

2 Supplier Refurbishment Programs: Major players like Kobelco and Anest Iwata now sell certified rebuilt units with full maintenance records.

3 Cross-Border Imports: South Korean and Taiwanese used compressors often price 15-20% lower than domestic options, but factor in JPY80,000-JPY150,000 shipping/import fees.

Your 2024 Buying Checklist

Before negotiating second-hand stationary air compressor prices in Japan:

Second Hand Stationary Air Compressor Price in Japan 2024: Cost List, Supplier Quotes & ROI Guide

Request oil analysis reports (last 3 maintenance cycles)
Verify operating hours vs manufacturer's service intervals
Test under full load for 30+ minutes
Confirm JIS B 8392-2018 compliance

How to Calculate ROI for Used Compressors

A Fukuoka packaging plant saved JPY1.2M annually using a refurbished 20HP compressor. Their math:

Energy cost: JPY15,000/month -> JPY7,800 after upgrade

Maintenance: JPY6,000/month -> JPY3,200 with warranty

Total savings/year: $(JPY7,200 + JPY2,800) * 12 = JPY120,000$

Payback period: 14 months

With new quotation requests surging 18% in Q1 2024 (Tokyo Machinery Association data), now's the time to act. Top suppliers like Osaka Plant Solutions report 3-4 week lead times for quality stock. Request multiple price comparisons and test major components before finalizing your second-hand stationary air compressor purchase.
