Second Hand Stationary Air Compressor for Sale in Taiwan 2024: Price List, Quotation & ROI Guide

Looking for a second hand stationary air compressor price in Taiwan? You're not alone. Over 300+ factories across Taipei and Kaohsiung searched this exact phrase last month. Why? Because new industrial compressors cost NT\$500,000+ - but smart buyers know used models slash costs by 40-60%.

What's Driving Taiwan's Second-Hand Compressor Boom?

Taiwan's manufacturing sector grew 5.2% in 2023 (National Development Council data). But here's the kicker: 78% of SMEs say equipment costs hurt profits. That's why the stationary air compressor resale market is exploding. Buyers from Tainan's plastic factories to Taichung's auto parts shops all want the same thing: quality machines at price per piece under NT\$200,000.

Real-World Cost Comparison (2024 Data)

New 50HP screw compressor: NT\$620,000

3-year-old used equivalent: NT\$320,000-380,000

Refurbished 2019 models: NT\$275,000 (free maintenance included)

Where to Get Reliable Price Quotes & ROI Estimates

Chaotic online listings made Mr. Chen, a Kaohsiung molding factory owner, waste NT\$85,000 on a lemon compressor last year. Now, he only uses suppliers with:

ISO 1217 performance certifications

12-month service warranties

On-site testing in Taiwan

Top Taipei dealer PowerTech Heavy Machinery reports a 200% spike in demand for used stationary compressors from German brands like Kaeser. Why? Their 10,000-hour runtime units resell for NT\$185,000-NT\$420,000 - still 35% cheaper than Chinese clones.

COVID's Hidden Impact on Compressor Prices

Taiwan's machinery exports dropped 9.8% during the pandemic (MOEA data). Surplus stock now floods the market. Example: A 75HP 2021 stationary air compressor originally priced at NT\$1.1 million sold for NT\$535,000 in Q1 2024 - 51% discount!
