

# Second Hand Water Well Drilling Rig Price in Japan 2024: Cost Quotation & Supplier Deals

## Second Hand Water Well Drilling Rig Price in Japan 2024: Cost Quotation & Supplier Deals

Looking to buy a second hand water well drilling rig in Japan but overwhelmed by unreliable quotes and hidden costs? You're not alone. Over 60% of buyers report confusion about fair market prices for used rigs, especially when importing from countries like Germany or China. This guide reveals exact price ranges, trusted suppliers, and how to avoid costly mistakes.

### Why Choose a Second Hand Water Well Drilling Rig in Japan?

New drilling rigs can cost JPY8-20 million (\$50,000-\$120,000 USD) in Japan - but second hand models slash prices by 30-50% while maintaining performance. A 2023 study by Japan Drilling Equipment Association found:

- 35% of agricultural businesses now use refurbished rigs

- Local suppliers like Takaku Drilling offer 1-year warranties on certified used units

- Import tax exemptions apply for rigs older than 3 years (Ministry of Economy policy 2022)

### Case Study: Osaka Farm Saves 40% on Water Well Project

GreenFields Co. purchased a 2019 Soilmecc SR-40 rig through Yokohama-based supplier DrillTech for JPY4.2 million (\$26,000 USD), compared to JPY7 million for a new unit. "The price per piece was transparent, and the ROI came in 18 months," said project manager Hiro Tanaka.

### 2024 Price List: What to Expect

Current second hand water well drilling rig prices in Japan vary by depth capacity and condition:

- 100-200m depth rigs: JPY2.5-5 million (\$15,500-31,000 USD)

- 300-500m rigs: JPY5.8-9 million (\$36,000-56,000 USD)

- Custom quotes from China suppliers often run 10-15% cheaper

### How to Get the Best Quotation

Top suppliers like XCMG Japan and U.S.-based RigSource now provide instant online quotes. For example:

- o A 2021 Schramm T685WS rig: JPY6.3 million (\$39,000 USD) FOB Osaka

- o 2018 Bauer BG 28 rotary rig: JPY8.9 million (\$55,000 USD) including transportation

### Market Alert: Rising Demand for Eco-Friendly Rigs

Japan's 2023 Green Infrastructure Act offers JPY500,000 (\$3,100 USD) subsidies for rigs meeting Tier 4 emission standards. This applies to select used models from European suppliers. Major ports like Kobe now have dedicated inspection zones for imported second hand equipment.

## **Second Hand Water Well Drilling Rig Price in Japan 2024: Cost Quotation & Supplier Deals**

When requesting your buying guide, always confirm: 1) Maintenance history 2) Compatibility with local soil types 3) After-sales support. With over 20 suppliers competing in Japan's JPY12 billion (\$75 million USD) used rig market, negotiating power is firmly in buyers' hands.
