

Second Hand Water Well Drilling Rig for Sale in Sweden: Price List 2024 & Supplier Deals

Second Hand Water Well Drilling Rig for Sale in Sweden: Price List 2024 & Supplier Deals

Need a second hand water well drilling rig at the best price in Sweden? You're not alone. With water scarcity affecting 15% of Swedish rural areas in 2023, demand for affordable drilling equipment has surged. Let's break down current market prices, ROI-boosting deals, and trusted suppliers.

What's the Average Cost of Used Water Well Drilling Rigs?

Second-hand rigs in Sweden typically range from EUR12,000 to EUR45,000. Entry-level truck-mounted models (like the 2018 Soilmec SR-30) start at EUR18,500, while heavy-duty rigs (2020 Bauer BG 28) hit EUR40,000+. Prices vary based on:

- Drilling depth capacity (100m vs 300m+)
- Engine hours (under 2,000 preferred)
- Hydraulic system condition

Sweden vs. Germany: Where to Get Better Deals?

Swedish suppliers offer 8-12% higher prices than German traders for similar models. Why? Limited local stock. But here's a smart workaround: import certified refurbished rigs from Hamburg dealers like Bohrtech. Their EUR23,900 2021 Schramm T685 package includes:

- Free EU-wide shipping
- 6-month warranty
- Spare part kits (worth EUR1,200)

3 Proven Ways to Verify Rig Quality

Got a quote from a Gothenburg supplier? Don't sign until you:

- Check actual drill footage - 55% of used rigs report false meterage
- Request oil analysis reports - Reveals hidden engine wear
- Test hydraulic pressure at 300 bar - Identifies leaks early

Why Chinese Rigs Dominate Budget Buys

Shanghai-made water well drilling rigs like the Jintai XYL-200 cost 40% less (EUR9,800-EUR14,500) than European models. While they average 18% shorter lifespans, their low price per piece suits seasonal contractors. Stockholm-based Nordic Drilling AS saved EUR21,000 by buying 2 Chinese rigs for temporary farm projects.
